Grades K-5. As he gets into bed on his first day of school, Nick tells his father, "There's a boy in my class named David. He has black hair, like you. He wears glasses too. He's not you, is he?" Nick's father replies, "Oh, yes, that's me," and so begins a playful battle as Nick attempts to trick his mother and father into revealing the mystery of Big and Little David. School success in the 21st century requires proficiency with expository discourse -- the use and understanding of informative language in spoken and written modalities. This occurs, for example, when high school students read their textbooks and listen to their teachers' lectures, and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations. Although many students are proficient with the expository genre, others struggle to meet these expectations. This book is designed to provide information on the use and understanding of expository discourse in school-age children, adolescents, and young adults. Recently, researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders. Although many books have addressed the development of conversational and narrative discourse, by comparison, books devoted to the topic of expository discourse are sparse. This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders. It will be of interest to a range of professionals, including speech-language pathologists, teachers, linguists, and psychologists who are concerned with language development and disorders. These fun writing exercises will improve students' understanding of the writing process along with their language arts skills. This engaging reinforcement workbook includes reproducible practice and application work pages, evaluation rubrics for teacher and students, student writing prompts, writing skills tests, and an answer key. Unit topics include using commas, narrative writing, expository writing, writing a persuasive essay, writing a vignette, using adjectives and adverbs, and more! Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content. This introductory creative writing text uses a unique, multi-genre approach to provide students with a broad-based knowledge of their craft, treating them as professional writers. Beginning by discussing elements common to all genres, this book underscores the importance of learning good writing habits before committing to a genre, encouraging writers to look beyond their genre expectations and learn from other forms. The book then devotes one chapter to each of the major literary genres: fiction, poetry, drama and creative nonfiction. These style-specific sections provide depth as they compare the different genres, furnishing students with a comprehensive understanding of creative writing as a discipline and fostering creativity. The discussion concludes with a chapter on digital media and an appendix on literary citizenship and publishing. With exercises at the end of each chapter, a glossary of literary terms, and a list of resources for further study, A Writer's Craft is the ideal companion to an introductory creative writing class. It has been listed as one of the

'Best Books for Writers' by Poets and Writers magazine. This qualitative two-case study draws from the intersection of three theoretical perspectives: sociocultural theory, transactional theory, and complex systems theory. Guided by two research questions, this qualitative study explored the conditions two seventh grade English language arts teachers set for teaching expository writing and their implications. Deductive coding based on seven a priori patterns of powerful writing instruction (empathy, inquiry, dialogue, authenticity, apprenticeship, re-visioning, and deep content learning) revealed six conditions for teaching expository writing. Inductive pattern analysis of these conditions revealed three emergent themes: reinforcing structures, mediating transactions, and balancing tensions. These findings suggest that teaching expository writing is a complex system filled with dialectical relationships. As interdependent pairs, these relationships encompass the entire system of expository writing instruction, including the structural and transactional aspects of teaching and learning to write. The overlapping conditions and themes demonstrate that expository writing appears ambiguous at times; however, routine, yet responsive instruction, framed by apprenticeship and a balance of reading and writing activities designed to inspire self-discovery are fundamental to the process of teaching expository writing. The final chapter includes instructional implications and a discussion about the significance of setting conditions for generative literacy learning. Recommendations for future research include writing research based on complexity theory, connections between expository writing and empathy, and critical thinking relative to critical action.

Gretchen Bernabei has taught middle school and high school for 30 years. These volumes from gifted expositor John Phillips teaches the importance of taking a few steps back from Scripture in order to gain fresh insight into the message, meaning, and art of the Bible. The Explore CMT Prep writing series provides in-depth instruction and practice in the skills essential for success in the writing portion of the CMT • In Part One, students first follow a guided instructional section targeted to the expectations of the CMT Writing section. They will be presented with sample prompts and concepts directly related to building familiarity with the writing section of the CMT test. • In Part Two, students move on to reviewing the elements of good writing in such areas as organization, beginning a composition, interesting and descriptive language, details, proper sentence and paragraph construction, and ending a composition. They then proceed through a detailed sample

exercise. • Students are presented with at least ten sample exercises in which they are encouraged to recognize and critique organization, relevance, elaboration, tone, purpose, and focus, as well as correct sentence construction and appropriate use of details and dialogue. They are then given a similar writing prompt in a suitable writing genre to apply these same skills of evaluation and critical thinking to their own writing. • Finally, in Part Three of the book, students are given a few additional lessons in which they are expected to read a brief composition and rewrite it, based almost exclusively on their expanded understanding of the elements of good writing as they've practiced them. They are then expected to answer questions related to their rewritten compositions, evaluating their own writing as they would anyone else's. Once upon a time...children's nonfiction books were stodgy, concise, and not very kid friendly. Most were text heavy, with just a few scattered images decorating the content and meaning, rather than enhancing it. Over the last 20 years, children's nonfiction has evolved into a new breed of visually dynamic and engaging texts. In *5 Kinds of Nonfiction: Enriching Reading and Writing Instruction with Children's Books*, Melissa Stewart and Dr. Marlene Correia present a new way to sort nonfiction into five major categories and show how doing so can help teachers and librarians build stronger readers and writers. Along the way, they: Introduce the 5 kinds of nonfiction: Active, Browseable, Traditional, Expository Literature, and Narrative -; and explore each category through discussions, classroom examples, and insights from leading children's book authors Offer tips for building strong, diverse classroom texts and library collections Provide more than 20 activities to enhance literacy instruction Include innovative strategies for sharing and celebrating nonfiction with students. With more than 150 exemplary nonfiction book recommendations and Stewart and Correia's extensive knowledge of literacy instruction, *5 Kinds of Nonfiction* will elevate your understanding of nonfiction in ways that speak specifically to the info-kids in your classrooms, but will inspire all readers and writers. *Insight Contexts* provides students with a variety of writing tips and strategies for developing excellent Context responses. Intended for teachers, this monograph argues that, unlike the structured, formulaic "school" essay, personal essays in the manner of Michel de Montaigne lead students to explore their connections with ideas and texts. The monograph describes several strategies which use writing as a tool for critical thinking. The monograph contains the following chapters: (1) "The School Essay (Bad Memories of)"; (2) "The Case against Writing--Plato's Challenge"; (3) "'For it is myself that I portray': Montaigne's Legacy"; (4) "Invitations to the Essay"; and (5) "'I'm not going to talk about it'." Forty-three references and an annotated bibliography derived from searches of the ERIC database are attached. (MS) Discover how to effectively incorporate literacy instruction into your middle or high school science classroom with this practical book. You'll find creative, inquiry-based tools to show you what it means to teach science with and through writing, and strategies to help your students become young scientists who can use reading and writing to better understand their world. Troy Hicks, Jeremy Hyler, and Wiline Pangle share helpful examples of lessons and samples of students' work, as

well as innovative strategies you can use to improve students' abilities to read and write various types of scientific nonfiction, including argument essays, informational pieces, infographics, and more. As all three authors come to the work of science and literacy from different perspectives and backgrounds, the book offers unique and wide-ranging experiences that will inspire you and offer you insights into many aspects of the classroom, including when, why, and how reading and writing can work in the science lesson. Featured topics include: Debates and the current conversation around science writing in the classroom and society. How to integrate science notebooks into teaching. Improving nonfiction writing by expanding disciplinary vocabulary and crafting scientific arguments. Incorporating visual explanations and infographics. Encouraging collaboration through whiteboard modeling. Professional development in science and writing. The strategies are all aligned to the Next Generation Science Standards and Common Core State Standards for ease of implementation. From science teachers to curriculum directors and instructional supervisors, this book is essential for anyone wanting to improve interdisciplinary literacy in their school. High-school writing prompts often ask students to provide overly simplified responses to complicated issues, but a person's stance in the real world can rarely, if ever, be reduced to "agree or disagree." Arguments are complex, with more than two points of view and a range of evidence to consider; however, writing classes don't always embrace that complexity. *Real Writing: Modernizing the Old School Essay* contends that engaging fully with complex texts and difficult, nuanced arguments helps students become better thinkers and writers, more fully prepared for life both in and after high school. This writing textbook bridges factual, critical, and expressive modes of writing to help students develop a reflective sense of why and how to write for university, professional, and public audiences. Exploring the ways in which writing builds tools for argument both in and beyond the university, it enables students to break out of the dusty and formulaic patterns of writing that too often threaten to render academic studies irrelevant. In a playful, personal, essayistic style, it examines existing academic writing methods and develops new modes of narrative-based expression rooted in the humanities. Reflective analysis invites emerging writers to self-consciously craft convincing and impassioned writing practices using an expanded methodological toolbox. It aims to imbue academic writing with the expressive potential of artistic research by transforming existing methods of articulating analysis within a broader expressive system, developing skills more typical of creative writing, such as providing a setting, considering frame, engaging emotions, expansion, and concision. If we believe in the value of our thoughts, discoveries, and arguments, we must enable them to sing. *Loving Writing* can be used as a textbook for advanced or introductory college writing courses and provides innovative guidance to liberal arts students seeking to develop their writing abilities. Contains lessons and teaching strategies that help students bring organization, facts, and flair to their informational writing. "Becoming a designer takes a huge amount of time and education. With so many skills to learn, many people never get the chance to master the one skill that can give them a real advantage in business or academia: They never learn to write well." In *Writing for the Design Mind* author, designer and educator Natalia Ilyin offers clear, concise, and humorous writing tips, techniques and strategies to people who have spent their lives mastering design rather than learning to write. Ilyin's book helps designers approach writing in the same ways they approach designing – teaching skills and methods through encouragement, practical exercises and visual advice. Writing well is a skill, like any other, and with this book you can learn to do it with confidence. //Winner in the 50 Books | 50 Covers award 2019 from the AIGA//

**A Down-to-Earth Approach** James Henslin shares the excitement of sociology with his acclaimed down-to-earth approach and personal writing style. *Sociology: A Down-to-Earth Approach*, 12/e, highlights the sociology of everyday life and its relevance to students' lives. Six central themes help students stimulate their sociological imagination: down-to-earth sociology, globalization, cultural diversity, critical thinking, the new technology, and the influence of the mass media on our lives. MySocLab is an integral part of the Henslin program. Engaging activities and assessments provide a teaching and learning system that helps students discover sociology in their lives. With MySocLab, students can watch videos on sociological core concepts, explore real-world sociology through the new Social Explorer, and develop critical thinking skills through writing. This title is available in a variety of formats and prices - digital and print. Pearson offers its titles on the devices students love through Pearson's MyLab products, CourseSmart, Amazon, and more. This textbook is suitable for self-study. It takes students through a step-by-step process of writing expository, argumentative, and compare and contrast essays. Includes information on structuring an essay, enhancing introductions, judging the quality of sources, citing information and improving the academic tone of language. Presents a collection of essays on the teaching of composition and essay writing. Although sentence-combining researchers acknowledge the importance of syntax-to-discourse transfer, their treatments have achieved it in varying degrees through unclear procedures. *Improving the Expository Writing Skills of Adolescents* suggests effective strategies for contextualizing learning in the English language arts, focusing on a novel method of syntax instruction called 'discourse-function sentence combining.' The language arts objectives are integrated with ninth grade biology materials. This book is a study of creative drive and creative cognition in the context of expository composing processes. Highlighting incubation (the second stage of the creative process) as a crucial but often misconstrued and/or neglected event in the quest for insight, the

author explores the nature of this elusive phenomenon from various angles, while also forwarding an argument of special significance to teachers of writing. A pedagogy informed by incubation theory can uniquely and profoundly assist students in negotiating the complex demands of producing text that rises above what might be labeled perfunctory or mundane. As digital technologies continue to develop and evolve, an understanding of what it means to be technologically literate must also be redefined. Students regularly make use of digital technologies to construct written text both in and out of the classroom, and for modern writing instruction to be successful, educators must adapt to meet this new dichotomy. *Exploring Technology for Writing and Writing Instruction* examines the use of writing technologies in early childhood, elementary, secondary, and post-secondary classrooms, as well as in professional development contexts. This book provides researchers, scholars, students, educators, and professionals around the world with access to the latest knowledge on writing technology and methods for its use in the classroom. \*\*This is a Google Slides version of the “What is an Informative Essay? & Writing an Informative Essay” chapter from the full lesson plan *How to Write an Essay*\*\* Take the fear out of writing essays and empower your students by giving them the tools to comprehensively express their point of view.
