A Mechanic and a Gentleman: an Odyssey Into the Automotive Repair Experience Apr 14 2022 This is a nonfiction account. Names and identifying characteristics have been changed. Welcome to Harrison Technical Institute, where aspiring mechanics are given a formal introduction to the world of automotive repair. It is a place peopled by a cast of unforgettable characters. The seventeen-year old car genius felled by the oldest and most powerful drug inflicted upon man. The stubborn Ecuadorian father who insists on hacking everything. The trash-talking white kid who has an amazing penchant for inserting his foot in his mouth. The giggly, disruptive black student who generously shares his stash. Young and not-so-young hormonal men who sexually harass anything that moves. Then there's Bill, the charming teacher who tries to instill order and shape his charges into productive contributors to the profession. Finally, there's your tour guide, Sue Edwards, one of the students who studies this chaos from the perspective of a woman possessing a white-collar, professional background. She didn't set out to write this memoir, but the stories were too good not to share. Laced with (immature) humor and surprising moments of sensitivity, *A Mechanic and a Gentleman* unveils the automotive repair environment, and its dirty, greasy underside. It's a tale containing observations about men and women, the working and professional classes, race, culture, sexuality, ethics, and the industry at large. Oh, yeah, there's stuff about fixing cars, too. It's an insider's look into what it takes to be an automotive mechanic. You may never look at one the same way again.

Wars of the Anunnaki Dec 11 2021 Examines the Anunnaki gods' evolving relationships with humanity, their power struggles, and the details of their nuclear war on Earth • Analyzes the crisis and rationale behind the Anunnaki decision to nuke 5 cities in the Jordan plain, resulting in the obliteration of Sumerian civilization • Draws upon the work of Zecharia Sitchin, the Book of Genesis, Sumerian clay tablets, and archaeological evidence such as ancient radioactive skeletons • Examines the Anunnakis' lack of higher consciousness, their reliance on technology, their sacred power objects and sacred geometry,

and the possibility of Anunnaki bases on Mars in the distant past. The detonation of nuclear weapons in the 20th century was not the first time humanity has seen such terrible destruction. Drawing upon the work of Zecharia Sitchin, the Book of Genesis, Sumerian clay tablets, and archaeological evidence such as ancient radioactive skeletons, Chris Hardy reveals the ancient nuclear event that destroyed the Sumerian civilization and the power struggles of the “gods” that led up to it. The author explains how the Anunnaki came to Earth from the planet Nibiru seeking gold to repair their ozone layer. Using genetic engineering, they created modern humanity to do their mining work and installed themselves as our kings and our gods. Anunnaki god Enki had a fatherly relationship with the first two humans. Then Enlil, Enki’s brother, took over as Commander of Earth, instating a sole-god theocracy and a war against the clan of Enki and humanity for spoiling the Anunnaki bloodlines through interbreeding. This shift imposed a blackout not only of the very human nature of the Anunnaki “gods” but also of humanity’s own ancient past on Earth. Two of Enlil’s attacks against the Enki clan and humanity are described in the stories of the Deluge and the Tower of Babel. His final attempt, after coercing the Assembly of the Gods into voting yes, was the nuclear bombing of 5 cities of the Jordan plain, including Sodom and Gomorrah, which resulted in the destruction of the Sumerian civilization and the Anunnakis’ own civilization on Earth, including their space port in the Sinai. The author reveals how, after each attempt, humanity was saved by Enki, chief scientist Ninmah, and Enki’s son Hermes. The author explores how the Anunnakis’ reliance on technology and their recurrent wars caused them to lose touch with cosmic consciousness. And she reveals how we will be doomed to repeat this dynamic until humanity awakens to our true origins.

Not Broken... Jul 26 2020 Kasalobi was born in the Democratic Republic of Congo. A french speaking country. He became a teacher at Boboto college after graduating from IPN, the national school of pedagogy in Kinshasa. As streets photographer, he made enough money to put himself back in school at ISC, an accounting college. That diploma led him to find a night job at Kinshasa Ndolo airport, there he started taking flying lessons with his boss' Cessna 150. The political situation in his native Congo obliged him to seek for asylum in the United States. That trip allowed him to accumulated flying hours at Acme school of Aeronautics at Meacham Field airport, in Fort Worth Texas. He later took his aviation ground school and his aviation technology at Mountain View College in Dallas Texas where he also studied correspondence, writing and reading. That helped him to become a reporter and DJ on the African Ambiance show at KNON radio, 89.3 FM. As one of the representatives of Congolese Community of Dallas and Fort Worth, Kasalobi co-wrote the community by-law and created l' Africana, a Congolese driving school. He lives in Hurst Texas and loves to travel, reason why he graduated from Swift University, a Phoenix Arizona transportation company at Lancaster Texas. Including Mexico and Canada, he is a US 48 states Swift truck driver. Kasalobi is an active internet Congolese political analyst and a full time writer.

Start-up Nation Mar 14 2022 What the world can learn from Israel's meteoric economic success. Start-Up Nation addresses the trillion dollar question: How is it that Israel -- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

How to Build a High-Performance Mazda Miata MX-5 Oct 09 2021 The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata's popularity has grown, and the number of aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen!
