These topics are contextualised with further chapters on the concept of childhood and children's rights, the international legal framework in which the Convention operates and a substantive chapter on the Convention itself. This fourth edition has been updated and revised, including a new chapter dealing with issues arising from childhood in the age of unprecedented digital technological advancements; a crucial issue for childhood experiences in modern times.

This edition also includes new case studies, recent legal developments in the field of international child law, and inclusion of broader scholarship to capture diverse views on international law and child law. The aim of this book is to provide the reader with an accessible, informed, critical and scholarly account of the international law framework relating to children. Drawing on a range of legal and other disciplines, this book remains a valuable resource for those in the course of study and research in this area. The laws governing humanitarian action stand at the intersection of several fields of international law, regional agreements, soft law and domestic law. Through in-depth case studies and analyses, expert scholars and practitioners come together to offer interdisciplinary approaches which include contributions from legal policy, international relations and philosophical perspectives. Providing invaluable overviews and insights, this collection of essays sheds light on the subject and makes sense of the various elements involved to elucidate the foundations of law and policy of humanitarian action. This book brings together three distinct areas of International Law - namely Environmental, Heritage and Ocean Law - to address the international legal protection of historically significant wrecks, with particular focus on the environmental hazards they may pose. The confluence of Heritage Law and the Law of the Sea with International Environmental Law represents

an important development in international governance strategies for the twenty-first century, in particular those legal and administrative regimes that concern the world's oceans and underwater cultural heritage protection. Importantly, connections between international legal regimes, such as the 1982 Law of the Sea, and institutions like the International Maritime Organisation (IMO) and United Nations Education Scientific Cultural Organisation (UNESCO), can play a crucial part in governance strategies that involve the regulation of marine pollution and historic shipwrecks. The UN Security Council formally acknowledged an obligation to promote justice and the rule of law in 2003. This volume examines the extent to which the Council has honoured this commitment when exercising its powers under the UN Charter to maintain international peace and security. It discusses both how the concept of the rule of law regulates, or influences, Security Council activity and how the Council has in turn shaped the notion of the rule of law. It explores in particular how this relationship has affected the Security Council's three most prominent tools for the maintenance of international peace and security: peacekeeping, sanctions and force. In doing so, this volume identifies strategies for better promotion of the rule of law by the Security Council. This book will be of interest to scholars and students of international law, international relations,

international development and peacekeeping. In today's world, where it has become fairly easy for a taxpayer to move back and forth from one country to another, it has become quite a common tax strategy, especially among wealthy individuals and multinational companies, to transfer their residence, income, and assets abroad mainly to reduce tax burden. Particularly in Europe, many wealthy individuals have moved their residence abroad mostly for tax purpose. Thus, tennis legend Bjorn Borg, who was known to have transferred decades ago his residence from Sweden to Monaco, is obviously not alone. A more recent, well-publicized case was Gerard Depardieu, who showed his intention of leaving France after having acquired Russian citizenship in 2013. This famous French actor and entrepreneur is reported to have made a comment that the French government's recent plan of raising the top marginal individual income tax rate is just like penalizing talented people who have achieved success in their careers. The Routledge Handbook of Human Rights and Disasters provides the first comprehensive review of the role played by international human rights law in the prevention and management of natural and technological disasters. Each chapter is written by a leading expert and offers a state-of-the-art overview of a significant topic within the field. In addition to focussing on the role of human rights obligations in disaster preparedness and response, the volume offers a broader perspective by examining how human rights law interacts with other legal regimes and by addressing the challenges facing humanitarian organizations. Preceded by a foreword by the International Law Commission's Special Rapporteur on the Protection of Persons in the Event of Disasters, the volume is divided into four parts: Part I: Human rights law and disasters in the framework of public international law Part II: Role and application of human

rights law in disaster settings Part III: (Categories of) rights of particular significance in a disaster context Part IV: Protection of vulnerable groups in disaster settings Providing up-to-date and authoritative contributions covering the key aspects of human rights protection in disaster settings, this volume will be of great interest to scholars and students of humanitarianism, international law, EU law, disaster management and international relations, as well as to practitioners in the field of disaster management. The Encyclopedia of Deception examines lying from multiple perspectives drawn from the disciplines of social psychology, sociology, history, business, political science, cultural anthropology, moral philosophy, theology, law, family studies, evolutionary biology, philosophy, and more. From the "little white lie," to lying on a resume, to the grandiose lies of presidents, this two-volume reference explores the phenomenon of lying in a multidisciplinary context to elucidate this common aspect of our daily lives. Not only a cultural phenomenon historically, lying is a frequent occurrence in our everyday lives. Research shows that we are likely to lie or intentionally deceive others several times a day or in one out of every four conversations that lasts more than 10 minutes. Key Features: More than 360 authored by key figures in the field are organized A-to-Z in two volumes, which are available in both print and electronic

formats. Entries are written in a clear and accessible style that invites readers to explore and reflect on the use of lying and self-deception. Each article concludes with cross references to related entries and further readings. This academic, multi-author reference work will serve as a general, non-technical resource for students and researchers within social and behavioral science programs who seek to better understand the historical role of lying and how it is employed in modern society. From the national bestselling author of *Brother, I'm Dying* and *The Dew Breaker*: a "fiercely beautiful" novel (*Los Angeles Times*) that brings us deep into the intertwined lives of a small seaside town where a little girl, the daughter of a fisherman, has gone missing. Just as her father makes the wrenching decision to send her away for a chance at a better life, Claire Limyè Lanmè—*Claire of the Sea Light*—suddenly disappears. As the people of the Haitian seaside community of Ville Rose search for her, painful secrets, haunting memories, and startling truths are unearthed. In this stunning novel about intertwined lives, Edwidge Danticat crafts a tightly woven, breathtaking tapestry that explores the mysterious bonds we share—with the natural world and with one another. The IMF's principal statistical publication, *International Financial Statistics (IFS) Online*, is the standard source of international statistics on all aspects of international and

domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly. This collection takes a thematic and interpretive, system-wide and inter-jurisdictional comparative approach to the debates and controversies related to the growth of international courts and tribunals. By providing a synthetic overview and critical analysis of these developments from a variety of perspectives, it both contextualizes and stimulates future research and practice in this rapidly developing field. This handbook examines the sources of international law, how the understanding of sources changed throughout the history of international law; how the main legal theories understood sources; the relationship between sources and the legitimacy of international law; and how sources differ across the various sub-areas of international law.-- Heroin, Organized Crime, and the Making of Modern Turkey explores the history of organized crime in Turkey and the roles which gangs and gangsters have played in the making of the Turkish state and Turkish politics. Turkey's underworld, which has been at the heart of several devastating scandals over the last several decades, is strongly tied to the country's long history of opium

production and heroin trafficking. As an industry at the centre of the Ottoman Empire's long transition into the modern Turkish Republic, as important as the silk road had been in earlier centuries, the modern rise of the opium and heroin trade helped to solidify and complicate long-standing relationships between state officials and criminal syndicates. Such relationships produced not only ongoing patterns of corruption, but helped fuel and enable repeated acts of state violence. Drawing upon new archival sources from the United States and Turkey, including declassified documents from the Prime Minister's Archives of the Republic of Turkey and the Central Intelligence Agency, Heroin, Organized Crime, and the Making of Modern Turkey provides a critical window into how a handful of criminal syndicates played supporting roles in the making of national security politics in the contemporary Turkey. The rise of the 'Turkish mafia', from its origins in the late Ottoman period to its role in the 'deep state' revealed by the so-called Susurluk and Ergenekon scandals, is a story that mirrors troubling elements in the republic's establishment and emphasizes the transnational and comparative significance of narcotics and gangs in the country's past. International Child Law examines and discusses the international legal framework and issues relating to children. Analysing both public and private international legal aspects, this cross-disciplinary

text promotes an understanding of the ongoing development of child law, children's rights and the protection of the child. Examining the theoretical background to the law, and providing a concise and clear overview of the instruments and institutions that protect children internationally, this text then focuses on key themes and issues in child law and children's rights. This new edition has been updated and revised throughout, including expanded material on the UN Convention on the Rights of the Child, as well as discussion of recent landmark developments on the law relating to recruiting child soldiers as a result of Lubanga (2012). The third edition also includes a new case study feature that critically considers key themes and issues in international child law in a real world context. Drawing on a range of legal and other disciplines, International Child Law is a valuable resource for those in the course of study and research in this area. This book investigates and discusses the phenomenon of internationalization of education policy and its consequences for national policymaking processes. By comparing educational outcomes and actors' reactions in different countries, it provides detailed insights into a highly contested policy field. This volume, which consists of three books and a CD-ROM and is edited by two legal experts on the Sierra Leone court, presents, for the first time in a single place, a comprehensive collection of all the interlocutory decisions and final trial and appeals judgments issued by the court in the case Prosecutor v. Charles Ghankay Taylor. The Taylor case is the jewel in the crown of the SCSL, as it was the first ever trial and conviction of a former African head of state for crimes committed in a neighboring state. It is also one of a handful of such significant cases in international criminal law. Jute plays an important role in the economies of South Asian countries. In India alone it sustains some four million families. Jute: Regional Focus summarizes the jute sector in countries like India, Bangladesh, China, Nepal, Thailand, Myanmar, and Brazil. Starting from raw material availability, it mentions the consumption, production,

export, and import of jute fibre and products. It also highlights the problems afflicting the jute sector like a stagnant yield, the lack of improvement in quality, the unremunerative price paid to the growers, the rising cost of production, the considerable competition from the synthetic sector, the demand erosion, the obsolescence of machinery, uneconomic working, etc. The book also discusses the competitive strength of jute against synthetics, possibilities of cost reduction, jute in relation to the environment, and the achievements of the International Jute Organisation. It also offers an insight into the implications of regional cooperation among the jute producing countries. It identifies the components of regional cooperation and investigates its importance and indispensability with reference to critical issues in the jute sector, as well as highlights the specific areas where some jute producing countries have contributed significantly. Certain examples where India has performed well in the field of diversification are given too. 1. Final Accounts of Companies, 2. Managerial Remuneration, 3. Disposal of Profits, 4. The Care Act 2014 contains provisions relating to adult care and support and health. Part 1 of the Act is intended to give effect to the policies requiring primary legislation that were set out in the White Paper Caring for our future: reforming care and support (Cm 8378, July 2012, ISBN 9780101837828), to implement the changes put forward by the Commission on the Funding of Care and Support (2011, ISBN 9780108510847), chaired by Andrew Dilnot, and to meet the recommendations of the Law Commission in its report on Adult Social Care (Law Com 326, HC 941, May 2011, ISBN 9780102971682) to consolidate and modernise existing care and support law. Part 2 of the Act also gives effect to elements of the Government's response to the Mid Staffordshire NHS Foundation Trust Public Inquiry that require primary legislation. Part 3 of the Act makes changes to the Trust Special Administration regime. It also takes forward the necessary legislative measures for the establishment of Health Education England and the

Health Research Authority as non-departmental public bodies. Part 4 of the Act establishes a fund for the integration of care and support with health services, to be known as the Better Care Fund and makes provision for additional safeguards around the general dissemination of health and care information. The winner of the Man Booker Prize, this "expertly written, perfectly constructed" bestseller (The Guardian) is now a Starz miniseries. It is 1866, and Walter Moody has come to stake his claim in New Zealand's booming gold rush. On the stormy night of his arrival, he stumbles across a tense gathering of 12 local men who have met in secret to discuss a series of unexplained events: a wealthy man has vanished, a prostitute has tried to end her life, and an enormous cache of gold has been discovered in the home of a luckless drunk. Moody is soon drawn into a network of fates and fortunes that is as complex and exquisitely ornate as the night sky. Richly evoking a mid-nineteenth-century world of shipping, banking, and gold rush boom and bust, *The Luminaries* is at once a fiendishly clever ghost story, a gripping page-turner, and a thrilling novelistic achievement. It richly confirms that Eleanor Catton is one of the brightest stars in the international literary firmament. The safeguarding of children and young people participating in sport has become an increasingly prominent concern in policy-making and research

communities around the world. Major organisations such as the IOC and UNICEF now officially recognize that children in sport can be at risk of exploitation and abuse, and this concern has led to the emergence of new initiatives and policies aimed at protecting vulnerable young people and athletes. This book is the first to comprehensively review contemporary developments in child protection and safeguarding in sport on a global level. The book is divided into two parts. Part One critically analyses current child protection and safeguarding policy and practice in sport across a range of countries, including the US, Canada, the UK, Australia, China and Germany, providing a global context for current policy and practice. This represents the most comprehensive review to date of the landscape of child protection and safeguarding in sport and provides a starting point for critical international comparisons. Part Two explores a range of issues related to child protection and safeguarding in sport, including many not covered in previous books, such as emotional abuse, injury and over-training. While in many instances the impetus for policy in this area has arisen from concerns about sexual abuse, the second part of this book therefore opens up a broader, more holistic approach to child and athlete welfare. By bringing together many of the leading researchers working in child and athlete protection in sport from around the world,

this book is important reading for all advanced students, researchers, policy-makers or practitioners working in youth sport, physical education, sports coaching, coach education or child protection. The entry into force of the Treaty of Lisbon in 2009 caused the EU's Charter of Fundamental Rights to be granted binding effect. This raised a host of intriguing questions. Would this transform the EU's commitment to fundamental rights? Should it transform that commitment? How, if at all, can we balance competing rights and principles? (The interaction of the social and the economic spheres offers a particular challenge). How deeply does the EU conception of fundamental rights reach into and bind national law and practice? How deeply does it affect private parties? How much flexibility has been left to the Court in making these interpretative choices? What is the likely effect of another of the reforms achieved by the Lisbon Treaty, the commitment of the EU to accede to the ECHR? This book addresses all of these questions in the light of five years of practice under the Charter as a binding instrument. An examination of the undercurrents of statehood and sovereign integrity vis-à-vis the State of Palestine, Taiwan, and Western Sahara; and examines why the international system is convoluted and often powerless in effecting the principles of self-determination. This denial of collective aspiration continues to be a source of regional and

global insight. This edited book reflects the "yin-yang" of East Asia — the analogy of co-existing "hot and cold" trends in that region. To concentrate only on geopolitical competition and regional "hot spots" will exaggerate, if not misrepresent East Asia as a Hobbesian world. Nevertheless, geopolitical competition cannot be ignored because a failure of the balance of power and deterrence between China and the United States (and its allies) will destabilise the region. There are four "vectors" in the geopolitics of East Asia: China rising, the United States "rebalancing" to this region, Japan "normalising" as a nation-state and ASEAN emerging as a regional community. The interplay of these four "vectors" will set the trajectory of geopolitics in East Asia. Another focus of this volume is on the politics of identity. The distinctiveness, character and flavour of a group, real or imagined, can be "cool." "Cool" as in being charming and appealing transcends national boundaries. Plurality and diversity of identities and cultures in East Asia can be a celebration of life and humanity. However, xenophobic identities, often based on exclusive race, language, religion and hegemony, and its subsequent politicisation can rend a nation apart. Indeed, the affirmation of one's identity may be at the expense or denial of the identity of "the other." Similarly, the assertion and the intricacy of identity and

nationalism in East Asia can also be problematic. However, a person or group can have multiple and different scales of identities. Indeed, identities can be fluid and situational. The International Crimes Tribunal is a domestic tribunal based on the International Crimes Tribunals Act from 1973 and the rules of procedure enacted by the Tribunal itself. The initiation of these trials almost 40 years after the war entails several challenges. The publication examines to what extent the Tribunal's legal framework as well as its jurisprudence comply with international standards as established in international treaties, customary international law and in the

jurisprudence of international criminal law. To this end, the substantive law and its interpretation as well as the procedural standards applied at these trials are examined thoroughly. At the same time, the analysis takes into account the political environment surrounding the Tribunal's work and assesses its impact on the country's process of coming to terms with the past."-- 1.
