From the New York Times bestselling author of Nice Girls Don't Get the Corner Office, a guide for women to find their innate leadership skills and use a leadership approach to be more confident and comfortable in all areas of their lives. The workplace is changing. From the boardrooms to non-profit organizations to the military, the typical male management style is now obsolete. There is a new generation of employees who reject hierarchical leadership and respond to the behaviors and characteristics that women traditionally exhibit. In other words, the time for women to take charge is now! In See Jane Lead, Dr. Frankel provides a blueprint for women who want to tap their natural leadership abilities and manage with greater ease and confidence in the business world, on the soccer field, at home, and beyond. With the same sharp insight that she demonstrated in Nice Girls Don't Get Rich and Nice Girls Don't Get the Corner Office, Dr. Frankel shows women how they can overcome sabotaging childhood behaviors that hold them back, while offering practical advice and real-life examples of strong female leaders who have succeeded--in male dominated fields--beyond their wildest dreams. English colonists settled Branford, Connecticut in 1644 expanding upon Native American pathways for their roads. The new settlers built their homes along Main and Montowese Streets which still form the nucleus of Branford's town center today. Gradually, the early settlers expanded their road system going north to North Branford, east to the Guilford border and west through Canoe Brook and Branford Hills. With extensive research using maps, town meeting records, city directories, and land records the author examines the origin and history of Branford's roads and the relevance of the street names. The scope of Branford's history as an 18th century farming community, during the industrial revolution bringing an influx of European immigrants in the 19th and 20th centuries, and finally as a suburban community after World War II can be viewed through the development of its streets. The book includes an alphabetical listing of Branford's streets, detail about resources, an appendix and includes more than 100 vintage photographs. For some time there has existed a need for a new account of the life and stylistic development of David Teniers the Younger (1610-1690). This need is made all the more obvious by the fact that Adolf Rosenberg's book, writ-ten in 1898, remains a most complete study of Teniers. 1 De Peyre's Biogra-phia

Critique of 1910 added little information not already published by Rosenberg.² A number of recent articles have dealt with various aspects of Teniers's life or style, but none has been entirely satisfactory. ⁵ Some are incomplete; others contain errors gleaned from earlier sources. None has dealt with the artist's stylistic evolution from his early works to the works of the mature Teniers. For undergraduate and graduate MIS courses. Jane Ellen Harrison (1850-1928) is the most famous female Classicist in history, the author of books that revolutionized our understanding of Greek culture and religion. This lively and innovative portrayal of a fascinating woman raises the question of who wins (and how) in the competition for academic fame. Jane Austen is one of England's most enduringly popular authors, renowned for her subtle observations of the provincial middle classes of late eighteenth- and early nineteenth-century England. This guide to Austen's much-loved work offers: an accessible introduction to the contexts and many interpretations of Austen's texts, including film adaptations, from publication to the present an introduction to key critical texts and perspectives on Austen's life and work, situated within a broader critical history cross-references between sections of the guide, in order to suggest links between texts, contexts and criticism suggestions for further reading. Part of the Routledge Guides to Literature series, this volume is essential reading for all those beginning detailed study of Jane Austen and seeking not only a guide to her works but also a way through the wealth of contextual and critical material that surrounds them. They were the most remarkable couple in London: the great sage Carlyle, with his vehement prophecies, and his witty, sardonic wife Jane. It was a strong, close, mutually admiring yet often mutually antagonistic partnership, fascinating to all who observed it. The Carlyles lived at the heart of English life in mid-Victorian London, but both were outsiders, a largely self-educated Scottish pair who took a sometimes caustic look at the society they so influenced - Carlyle through his copious writings, and both through their network of acquaintances and correspondents. Carlyle's fame was confirmed by his Sartor Resartus of 1843, The French Revolution, his lectures on heroes and hero-worship and by his radical account of contemporary industrial Britain in Past and Present, 1843. Both husband and wife were great letter-writers, Carlyle commenting on the matters of the day, dashing off pen portraits of those he met and Jane with her brilliant stories and her sharp, dry humour. Yet despite her brilliance, Jane suffered, especially from Carlyle's infatuation with the lion-hunting Lady Ashburton, and the tensions in their marriage grew. The letters they wrote, both to each other and to others, make theirs the most well-documented marriage of the

nineteenth century and give us an unequalled portrait of a famously unhappy marriage. This moving and vivid biography describes their relationship with each other, from their first meeting in 1821 to Jane's death in 1866, and also their relationship with the world outside. Rosemary Ashton's inimitable blend of rigorous scholarship, warm sensitivity and lively wit makes this not only a portrait of a marriage but a picture of a whole age, elegant, erudite and entertaining. Ca Welcome to White Snake Diary: Exploring Self-Inscribers, where author and ethnographer Jane P. Perry asks: What is a diary and why do we keep them? Why do diarists feel compelled to record life, to collect memories and reflections? What happens when snapshots found in a junk store not only spark childhood memories but drive the creation of a diary? White Snake Diary explores the diary as a literary genre: what it looks like and what it can tell us about life and self-inscribers. Uniquely, White Snake Diary is also a diary, offering a timely #MeToo profile of growing up female. White Snake Diary capitalizes on the fascination of diaries either as precursors to our social media culture or as mirrors of our intimate absorption. Perry pulls on the allure of the repurposed with found photos, childhood school assignments, diary entries, cereal box text, letters, a newspaper clipping, doodles, essays, and professional reports. Perry writes with humor and attention to the little moments most people miss. Jane P. Perry is a retired Researcher and Teacher from the University of California, Berkeley's Harold E. Jones Child Study Center. She holds a Ph.D. in Education from U.C. Berkeley and has written on the importance of play in early childhood, Occupy Oakland, and familyhood. Take a journey with White Snake Diary: Exploring Self-Inscribers. Maxwell Fry and Jane Drew were pioneers of Modern Architecture in Britain and its former colonies from the late 1920s through to the early 1970s. As a barometer of twentieth century architecture, their work traces the major cultural developments of that century from the development of modernism, its spread into the late-colonial arena and finally, to its re-evaluation that resulted in a more expressive, formalist approach in the post-war era. This book thoroughly examines Fry and Drew's highly influential 'Tropical Architecture' in West Africa and India, whilst also discussing their British work, such as their post World War II projects for the Festival of Britain, Harlow New Town, Pilkington Brothers' Headquarters and Coychurch Crematorium. It highlights the collaborative nature

of Fry and Drew's work, including schemes undertaken with Elizabeth Denby, Walter Gropius, Denys Lasdun, Pierre Jeanneret and Le Corbusier. Positioning their architecture, writing and educational endeavours within a wider context, this book illustrates the significant artistic and cultural contributions made by Fry and Drew throughout their lengthy careers.

marriage is one of the most consequential decisions you will ever make in life, so it pays to know as much as you can about yourself, about what will be expected of you in marriage and about the person you hope to marry. Most of all, it is important to know what God thinks about marriage in general. A leading figure in the debate over the literary canon, Jane Tompkins was one of the first to point to the ongoing relevance of popular women's fiction in the 19th century, long overlooked or scorned by literary critics. Now, in *West of Everything*, Tompkins shows how popular novels and films of the American west have shaped the emotional lives of people in our time. Into this world full of violence and manly courage, the world of John Wayne and Louis L'Amour, Tompkins takes her readers, letting them feel what the hero feels, endure what he endures. Writing with sympathy, insight, and respect, she probes the main elements of the Western--its preoccupation with death, its barren landscapes, galloping horses, hard-bitten men and marginalized women--revealing the view of reality and code of behavior these features contain. She considers the Western hero's attraction to pain, his fear of women and language, his desire to dominate the environment--and to merge with it. In fact, Tompkins argues, for better or worse Westerns have taught us all--men especially--how to behave. It was as a reaction against popular women's novels and women's invasion of the public sphere that Westerns originated, Tompkins maintains. With Westerns, men were reclaiming cultural territory, countering the inwardness, spirituality, and domesticity of the sentimental writers, with a rough and tumble, secular, man-centered world. Tompkins brings these insights to bear in considering film classics such as *Red River* and *Lonely Are the Brave*, and novels such as Louis L'Amour's *Last of the Breed* and Owen Wister's *The Virginian*. In one of the most moving chapters (chosen for *Best American Essays* of 1991), Tompkins shows how the life of Buffalo Bill Cody, killer of Native Americans and charismatic star of the Wild West show, evokes the contradictory feelings which the Western typically elicits--horror and fascination with violence, but also love and respect for the romantic ideal of the cowboy. Whether interpreting a photograph of John Wayne of meditating on the slaughter of cattle, Jane Tompkins writes with humor, compassion, and a provocative intellect. Her book will appeal to many Americans who read or watch Westerns, and to all those interested in a serious approach to popular culture. The essays in this volume interpret Jane Austen's fiction through the lens of various sciences of the mind and brain, especially the cluster of disciplines implicated in the term cognitive science, including neuroscience, evolutionary biology, evolutionary and developmental psychology, and others. The field of cognitive literary studies has rapidly developed in the last few decades and achieved the status of an established (if still evolving) critical approach. One of the most popular authors to analyze from this perspective is Jane Austen. As numerous critics have noted, Austen was a keen observer of how the mind operates in its interactions with other minds, both when it functions successfully and when, as often happens, it goes awry, and her perceptions are often in synch with current neuroscientific and psychological research. Despite the widespread recognition of the special congruity between Austen's novels and cognitive science, however, no book has been devoted to this subject. *Jane Austen and Sciences of the Mind* is the first monograph wholly comprised of readings of Austen's oeuvre (juvenilia as well as all six completed novels) from cognitive and related psychological approaches. In addition, the volume operates under the assumption that cognitive and historicist approaches are compatible, and many essays situate Austen within the climate of ideas during her era as well as in relation to current research in the sciences and social sciences. *Jane Austen and Sciences of the Mind* offers a new lens for understanding and illuminating the concerns, techniques, and enduring

appeal of Austen's novels. Takes a closer look at the stomach's role in the digestive system. Explores the path food takes once it enters our bodies and ways we can keep our stomachs healthy. "Grand, robust, a rich and big novel."—Alice Walker, *The New York Times Book Review* "In [Jane Pittman], Ernest Gaines has created a legendary figure. . . . Gaines's novel brings to mind other great works: *The Odyssey*, for the way his heroine's travels manage to summarize the American history of her race, and *Huckleberry Finn*, for the clarity of [Pittman's] voice, for her rare capacity to sort through the mess of years and things to find the one true story of it all."—*Newsweek* Miss Jane Pittman. She is one of the most unforgettable heroines in American fiction, a woman whose life has come to symbolize the struggle for freedom, dignity, and justice. Ernest J. Gaines's now-classic novel—written as an autobiography—spans one hundred years of Miss Jane's remarkable life, from her childhood as a slave on a Louisiana plantation to the Civil Rights era of the 1960s. It is a story of courage and survival, history, bigotry, and hope—as seen through the eyes of a woman who lived through it all. A historical tour de force, a triumph of fiction, Miss Jane's eloquent narrative brings to life an important story of race in America—and stands as a landmark work for our time. DeCou for land in Haddonfield, N.J. Devils, ghosts, poltergeists, werewolves, and witches are all covered in this book about the "dark side" of supernatural beliefs in early modern Europe, tapping period literature, folklore, art, and scholarly writings in its investigation. The dark side of early modern European culture could be deemed equal in historical significance to Christianity based on the hundreds of books that were printed about the topic between 1400 and 1700. Famous writers and artists like William Shakespeare and Albrecht Dürer depicted the dark side in their work, and some of the first printed books in Europe were about witches. The pervasive representation of these monsters and apparitions in period literature, folklore, and art clearly reflects their power to inspire fear and superstition, but also demonstrates how integral they were to early modern European culture. This unique book addresses topics of the supernatural within the context of the early modern period in Europe, covering "mythical" entities such as devils, witches, ghosts, poltergeists, and werewolves in detail and examining how they fit in with the emerging new scientific method of the time. This unique combination of cultural studies for the period is ideal for undergraduate students and general readers. Sharks are one of the sea's most misunderstood and feared creatures. To this end, the book is structured to meet the requirements both of the student, with a basic knowledge of chemistry, biochemistry and microbiology and of persons working in the dairy industry. The basic approach is to discuss the manufacturing process in the context of technology and its related chemistry and microbiology, followed by a more fundamental appraisal of the underlying science. The dairy industry is defined in a broad context and information is included on imitation products and analogues. A number of innovations have been adopted in the presentation of the book. Information boxes and • points are used to place the text in a wider scientific and commercial context, and exercises are included in most chapters to encourage the reader to apply the knowledge gained from the book to unfamiliar situations. It is also our firm belief that the control of food manufacturing processes should be considered as an integral part of the technology and for this reason control points, based on the HACCP system, are included where appropriate.
