What's wrong with these methods of preservation? Here are some reasons why many people choose drying over the other methods of food preservation. Less time and skill required. If you've ever tried canning and given up because things didn't turn out as planned, take comfort: Dehydrating foods is a lot

easier and less time consuming. Less storage space needed. The era of living in oversized houses is gone, and these days many of us have moved into smaller homes. Maybe your grown children have moved back with you or your family's had a recent young addition. Either way we need to make the most of the space we have. The last thing we want to do is fill shelves with canned foods or even a chest freezer taking up valuable feet in the basement or garage. Dehydrating shrinks foods down to one-tenth of their original size, so a pound of carrots can easily fit into a small jar. If you have a small kitchen or limited storage space, dehydration is for you. Capture flavor when it's at its freshest. One of the best things about summer is the abundance and variety of produce. This book covers: - Why Dehydrate Foods? - The Best Ways, Temperature and Cooking Times to Dry Foods - Instructions on How To Dry Fruits, Vegetables, Meat and Herbs with easy and economical way - The Best Techniques to Preserve Dried Foods - Jerky Recipe - More Jerky Recipes - Snacks Recipes - More Snack Recipes - Fruit Leather Recipes - More Fruit Leather Recipes - Main Course Recipes - More Main Course Recipes Make preservation pay off. We all love to eat something tasty and sweet in between meals. When you dehydrate fruits, their flavors not only become more concentrated but they get sweeter and therefore make the ideal snack for both kids and adults. Enjoy preservative-free food.
