"If it is beyond your power

to control, let it go." "Do not wish that all things will go well with you, but that you will go well with all things." "In this way, you will overcome life's challenges, rather than be overcome by them." Epictetus (c. AD 50-135) was a former Roman slave who became a great teacher, deeply influencing the future emperor Marcus Aurelius among many others. His philosophy, Stoicism, was practical, not theoretical--aimed at relieving human suffering here and now. Epictetus knew suffering--besides being enslaved, he was lame in one leg and walked with a crutch. The Manual

is a collection of Epictetus' essential teachings and pithy sayings, compiled by one of his students. It is the most accessible and actionable guide to Stoic philosophy, as relevant today as it was in the Roman Empire. This new edition, published by Ancient Renewal, is rendered in contemporary English by Sam Torode. "This volume has been somewhat hastily prepared, to fulfil the promise recently made to the public of a Manual of Psychometry--a work to introduce the subject to the general reader--not an elaborate memoir for scientists, which need not be offered

until it is called for. As this volume contains the reports of many psychometric experiments with Mrs. B., I would state in advance that all such experiments which I report are as pure and true an illustration of Psychometry as possible--an accurate report of mental impressions as they arose, recorded as they were spoken deliberately. The mind of the psychometer in my experiments is always carefully guarded from all impressions but those which come from an invisible source by contact, without knowing what is the object or person to be described, which

must be carefully concealed to insure the purity of the result. Questions are never of a leading character, being only used to direct attention to the matters that need description. The reports are as careful and faithful as I could possibly make them, but most of them are imperfect illustrations of her psychometric intuition, given often when fatigued by her daily duties"--Preface.
