This major text by the author of Mass Communication Theory offers a comprehensive analysis of the growing field of assessment and evaluation of the performance of mass media. Across different societies, with varying media systems, there is evidence of increasing concern with the nature and quality of media output as well as about the independence and diversity of media systems. In this broad-ranging overview, Denis McQuail outlines the varying means of media performance assessment which have been attempted. He analyzes the central questions of what the 'public interest' means in this context, which criteria are relevant for assessing media performance, how such values are established and how they can be reconciled with the economic, Chan's book explores the challenges in assessing experiential learning, deepens our understanding, and inspires readers to think critically about the purpose of assessment in experiential learning. Experiential learning has been studied and proven to be effective for student learning, particularly for the development of holistic competencies (i.e. 21st century skills, soft skills, transferable skills) considered essential for individuals to succeed in the increasingly global and technology-infused 21st century society. Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences, however the assessment of these programmes tends to be limited, unclear, and contested. Assessment plays a central role in education policies and students' approach to learning. But do educators know how to assess less traditional learning such as service learning, entrepreneurship, cross-discipline or cross-cultural projects, internships and student exchanges? While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics, law, languages, science and social studies, there is a lack of assessments and research that focus on holistic competencies. How do we assess students' ability to think critically, problem solve, adapt, self-manage and collaborate? Central to the discussion in this book, is the reason students are assessed and how they should be assessed to bring out their best learning outcomes. Offering a collection of best assessment practice employed by teachers around the world, this volume brings together both theoretical and empirical research that underpins assessment; and perceptions of different stakeholders – understanding of assessment in experiential learning from students, teachers, and policymakers. The idea of assessment literacy also plays an important role in experiential learning, for example, reflection is often used in assessing students in experiential learning but how reflection literate are educators, are they

aware of the ethical dilemmas that arise in assessing students? These questions are discussed in detail. The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes. The book will be particularly informative to academic developers, teachers, students and community partners who struggle with the development and assessment for experiential learning, those who plan to apply for funding in experiential learning, and policymakers and senior managements seeking evidence and advice on fine-tuning curricular, assessment designs and quality assurance. Scientists from different disciplines, including anthropology, psychology, psychiatry, pediatrics, neurobiology, endocrinology, and molecular biology, explore the concepts of attachment and bonding from varying scientific perspectives. Attachment and bonding are evolved processes; the mechanisms that permit the development of selective social bonds are assumed to be very ancient, based on neural circuitry rooted deep in mammalian evolution, but the nature and timing of these processes and their ultimate and proximate causes are only beginning to be understood. In this Dahlem Workshop Report, scientists from different disciplines—including anthropology, psychology, psychiatry, and behavioral biology—come together to explore the concepts of attachment and bonding from diverse perspectives. In their studies they seek to understand the causes or the consequences of attachment and bonding in general and their different qualities in individual development in particular. They address such questions as biobehavioral processes in attachment and bonding; early social attachment and its influences on later patterns of behavior; bonding later in life; and adaptive and maladaptive (or pathological) outcomes. The studies confirm that social bonds have consequences for virtually all aspects of behavior and may be protective in the face of both physical and emotional challenges.

School Leader Internship, 4th Edition challenges school leader interns to build competencies in 52 leadership skill areas. This unique resource provides step-by-step guidance for interns, their supervisors, and their faculty on how to initiate an internship and evaluate interns' work. In this updated fourth edition, the content is organized around the latest National Policy

Board for Educational Administration (NPBEA) Professional Standards for Educational Leaders (2015) and includes intern activities to develop skills in cross-content literacy, distributive leadership, equity in practice, professional learning communities, remediation strategies, school improvement planning, and special populations. This is a critical resource for leadership preparation programs nationwide and the thousands of school districts that support leadership candidates. Special Features include: Beyond the Standards provide further independent practice, reflection, and development for students in the areas of action research, ethical and critical reasoning, dispositions and interpersonal skills, new technologies, school partnerships, and social justice. Self, Peer, and Superior Assessments help students to plan according to individual need, experience, and goals. Internship Plans allow students to assess, analyze, and prepare draft internship plans. Interview Suggestions help students develop a network and gain insight into administrative and curricular responsibility. Professional Development Activities encourage students to analyze and evaluate their experiences and plan for the future. Projects allow students to synthesize their skills. Presenting both a theoretical foundation and proven strategies for helping caregivers become more attuned and responsive to their young children's emotional needs (ages 0-5), this is the first comprehensive presentation of the Circle of Security (COS) intervention. The book lucidly explains the conceptual underpinnings of COS and demonstrates the innovative attachment-based assessment and intervention strategies in rich clinical detail, including three chapter-length case examples. Reproducible forms and handouts can be downloaded and printed in a convenient 8 1/2" x 11" size. COS is an effective research-based program that has been implemented throughout the world with children and parents experiencing attachment difficulties. The authors are corecipients of the 2013 Bowlby-Ainsworth Award, presented by the New York Attachment Consortium, for developing and implementing COS. See also the authors' related parent guide: Raising a Secure Child: How Circle of Security Parenting Can Help You Nurture Your Child's Attachment, Emotional Resilience, and Freedom to Explore. This book provides point-by-point guidance and firsthand interviews with interns, their colleagues, and their supervisors about issues such as advantages of an internship, dealing with coworkers, turning an internship into a career, and more. With the changing world scenario, the need for effective and efficient managers has increased manifold. The organizations require managers with analytical and problem solving abilities enabling them to exploit the opportunities presented. Today, the most important prerequisite for managers is to have well-developed communication skills so that they not only are able to communicate within the organizations but also with the groups outside the organization, customers, suppliers, government and the community. The development of these skills not only requires strong theoretical knowledge but also a practical experience. Although the four weeks internship program has not fully developed these abilities but it has at least given me a feel of the market. It has, to some extent, enabled me to see the relevance and applicability of various tools and theories of management. Moreover, this training has created an awareness of the various career opportunities available in the market as well as the tough competition. We, the students of commerce, have to face in securing jobs. A collection of the secrets of those who have mastered career mobility based on interviews with more than twenty rising stars from Fortune 100 companies. Their experiences are profiled after each chapter, offering an inside look at the process each interviewee took to achieve their goals. From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner

with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author’s friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers’ lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

MEET ERIN PARKER Erin is an economics student at Stanford University. She has had three investment banking internships spanning UBS (private wealth management), FT Partners (financial technology coverage), and J.P. Morgan in New York (syndicated and leveraged finance). She is co-president of Blyth Fund, a six-figure student investing group, and is on the board of Stanford Finance. Erin is also the Finance Director of Gumball Capital, a student-run startup whose mission is poverty alleviation.

WHAT READERS ARE SAYING: "I wish that this book had existed when I was applying for positions back in college. I was a economics major with almost no real job experience, and it must have shown in my interviews. I got lucky because UBS was willing to take a chance on me as a summer intern, which led me to get where I am now. If I could do it again, though, I would take the much easier route and read this book. It would have prepared me for the parts of the job I never imagined." - First Year Analyst At Citigroup

"Applying for my summer internship was a rough experience- I was afraid that I would never get the chance to show my skill in investment research to big companies because I would be rejected before I ever made it to the internship stage. Fortunately for me, this book helped me prepare and build my interview skills to the point where I felt that I had not just a fair shot at the job but an unfair advantage over the other candidates. It's a must read." - Current Intern At Goldman Sachs

America's foremost baby and childcare experts, William Sears M.D. and Martha Sears, R.N., explain the benefits -- for both you and your child -- of connecting with your baby early. Would you and your baby both sleep better if you shared a bed? How old is too old for breastfeeding? What is a father's role in nurturing a newborn? How does early attachment foster a child's eventual independence? Dr. Bill and Martha Sears -- the doctor-and-nurse, husband-and-wife team who coined the term "attachment parenting" -- answer these and many more questions in this practical, inspiring guide. Attachment parenting is a style of parenting that encourages a strong early attachment, and advocates parental responsiveness to babies' dependency needs. The Attachment Parenting Book clearly explains the six "Baby B's" that form the basis of this popular parenting style: Bonding, Breastfeeding, Babywearing, Bedding close to baby, Belief in the language value of baby's cry, and Beware of baby trainers. Here's all the information you need to achieve your most important goals as a new parent: to know your child, to help your child feel right, and to enjoy parenting. This report

describes the author's internship assignment at Honeywell Inc. - Large Information Systems Division from January, 1982 through August, 1982. The purpose of the assignment was to fulfill the internship requirements of the Doctor of Engineering Program. During the internship, the author held the position of VLSI design engineer, where he worked on a predefined project. The project's objective was to evaluate how circuit designs based on an advanced CMOS process, can be applied to hardware products at LISD. The internship allowed the author to successfully apply the MOS circuit design training, which was developed at Texas A&M, to an industrial project. In addition, involvement in different activities and exposure to the various problems not encountered in academia, made this internship an invaluable experience.

Internship Report from the year 2010 in the subject Didactics - Common Didactics, Educational Objectives, Methods, RWTH Aachen University, language: English, abstract: This internship report is placed under the following observation task: Classroom disruptions and their prevention. Both the theory and the observation carried out and its evaluation are presented.

Internship Report from the year 2004 in the subject Computer Science - Commercial Information Technology, grade: passed, Technical University of Ilmenau, language: English, abstract: Last year I made the decision to do an internship abroad and not in Germany. My aim was to get insights into another work and living culture. To do an internship abroad lots of preparation was necessary. I was supported in getting my job by the international student exchange organisation AIESEC. I chose India for my internship, as it is an emerging nation concerning IT business and a popular outsourcing destination. I applied for a job in the field of marketing. I had to do an Internet based interview in order to get the job at Net Solutions. AIESEC intermediated between the company and me before starting the traineeship and as well after I arrived in India. This document gives a comprehensive insight into my work in Net Solutions. First I introduce the company and country-specific particularities. Afterwards I explain my two major tasks, Marketing and Business Development as well as ISO 9000 certification before I conclude this report.

National Book Critics Circle Award Winner: "The terrifying story of the worst disaster in the history of the US Forest Service's elite Smokejumpers." —Kirkus Reviews A devastating and lyrical work of nonfiction, *Young Men and Fire* describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts together the scattered pieces of the Mann Gulch tragedy in this extraordinary book. Alongside Maclean's now-canonical *A River Runs Through It* and *Other Stories*, *Young Men and Fire* is recognized today as a classic of the American West. This edition of Maclean's later triumph—the last book he would write—includes a powerful new foreword by Timothy Egan, author of *The Big Burn* and *The Worst Hard Time*. As moving and profound as when it was first published, *Young Men and Fire* honors the literary legacy of a man who gave voice to an essential corner of the American soul. "A moving account of humanity, nature, and the perseverance of the human spirit." —Library Journal "Haunting." —The Wall Street Journal "Engrossing." —Publishers Weekly Prepare to be shocked. From the man The Wall Street Journal hailed as a "Swifteen satirist" comes the most shocking book ever written! *The Borowitz Report: The Big Book of Shockers*, by award-winning fake journalist Andy Borowitz, contains page after page of "news stories" too hot, too controversial, too -- yes, shocking -- for the mainstream press to handle. Sample the groundbreaking reporting from the news organization whose motto is "Give us thirty minutes -- we'll waste it." This book is the result of years of research following a realization of the mismatch of engineering skills produced by universities and those that industry required, based on the situation in Sub-Saharan Africa, equally applicable to other regions in Africa and indeed worldwide. The book is meant to assist engineering academics and engineers in industry to build capacity and cope with the dynamic trends in technology brought on by the 4th Industrial Revolution and to prepare for the 5th Industrial Revolution, an era predicted to be dominated by critical and system thinkers with creative and innovative skills as basic necessities. The book is also useful for policy-making researchers in academia, industrial and public sector researchers, and implementers in governments that provide required funding for the development of human resources and skills. The book primarily consists of the novel research and innovation approaches of modelling and building systems thinking sub-models which

were ultimately integrated into the Universal Systems Thinking (UST) model aimed at improving the quality of engineers and engineering practice. The initiatives in this book include strategies for bridging the gap between industry and academia through systems thinking research. The book provides information on how to model, simulate, adjust and implement integrated systems thinking approaches to engineering education and training for capacity building and sustainability. The book also covers approaches to address research gaps and mismatch of skills while capitalizing on the successes of several projects carried out and supported by the Royal Academy of Engineering over the years. This six-volume handbook covers the latest practice in technical and vocational education and training (TVET). It presents TVET models from all over the world, reflections on the best and most innovative practice, and dozens of telling case studies. The handbook presents the work of established as well as the most promising young researchers and features unrivalled coverage of developments in research, policy and practice in TVET. Multiple placements, delay in achieving deadlines, and emancipation have increased the burdens on already vulnerable foster children. The child welfare and court systems, despite good laws and policies, have generally failed to provide children with permanent homes in a developmentally timely manner. Ignorance of the nature and critical importance of bonding is a major cause of this lack of success. Attachment and bonding are words that have been used loosely to describe a variety of personal relationships, beginning with the theories of Bowlby and Ainsworth. Bonding is defined in practical and objective terms that are research-based. It is important and significant because its disruption can lead to significant increases in mental illness, crime, and homelessness. An overwhelming number of statistical studies have documented and affirmed this. Readers will learn how to perform a bonding evaluation and how to present the findings in court. The roles of the birth parent, foster parent, adoptive parent, child, case manager, mental health professional, attorneys, and the court are all considered for their part in achieving permanence for children in temporary care. Finally, the authors share innovative recommendations about ways to improve the system and reduce time in foster care. Every child has the right to a permanent home. "The World Health Report: research for universal health coverage" focuses on the importance of research in advancing progress towards universal health coverage. In addition, it identifies the benefits of increased investment in health research by low- and middle-income countries using case studies from around the world, and proposes ways to further strengthen this type of research. Hacking the Internship Process is designed to maximize your internship application results. The authors provide a smart, innovative methodology that leads readers through every aspect of winning their dream internship. The book optimizes reader efficiency by combining the most modern technological tools with "hacks" proven to get results. Follow simple steps in the book to build a powerful referral network, reach out to future bosses, ace interviews, and much more. Hacking the Internship Process is the perfect guide to get you on the path to obtaining the internship you have always wanted and prepare for a successful career in the field of your dreams.
