An inventively twisted psychological thriller from “a master of the slow build, the controlled burn” (Chicago Tribune). In the middle of the night, a man breaks into a woman’s house, finds her bedroom, and wakes her up. She’s the author who could save his soul by telling his story. He’s one of many characters waiting their turn—except now he’s cut the line. After all, she could die soon, leaving him lost forever. He refuses to leave until she gives him a name. And so his story begins . . . Alvar Eide, forty-two and single, works in an art gallery. He maintains a quiet life—until one icy winter morning when a drug-addicted young woman walks into his gallery to escape the cold. Alvar gives her a cup of coffee to warm her up. Soon after, she appears on his doorstep. The author is finally telling his story . . . but she never promised a happy ending. Broken is an unconventional, disturbing, and thought-provoking mystery from a master of the form, and winner of the Los Angeles Times Book Prize for her crime novel The Indian Bride. “Fossum crafts remarkably incisive psychological suspense: novels that carry the headlong momentum of thrillers and the acuity and weight of literary fiction.” —The Washington Post Book World “I always eagerly await a new novel from Karin Fossum.” —Ruth Rendell “Claustrophobic and intense.” —The Independent (UK) Riktor doesn’t like the way the policeman comes straight into the house without knocking. He doesn’t like the arrogant way he observes his home. The policeman doesn’t tell him why he’s there, and Riktor doesn’t ask. Because he knows he’s guilty of a terrible crime. But it turns out that the policeman isn’t looking for a missing person. He is accusing Riktor of something totally unexpected. Riktor doesn’t have a clear

conscience, but this is a crime he certainly didn't commit. These two books are regarded by most practitioners and students as being a two-volume set. The EU is a supranational organization, whose reach and influence extends well beyond its member states, especially to the many states that have signed various forms of association agreement with it. This book asks whether qualifying states who have eschewed EU membership

experience negative effects on their legal and political self-governing abilities, or whether they manage their independence with few such effects. It explores the idea that the closer the affiliation a non-member state has with the EU, the more susceptible to hegemony the relationship appears to be. In addition, the book provides an overview of the total range of agreements the EU has with non-member states. This text will be of key interest to scholars and students of in EU/European studies, Scandinavian studies, European and comparative politics, international relations, and democratization studies. The European Union is widely held to suffer from a democratic deficit, and this raises a wider question: can democracy at all be applied to decision-making bodies beyond the nation state? Today, the EU is a highly complex entity undergoing profound changes. This book asks how the type of cooperation that the EU is based on can be explained; what are the integrative forces in the EU and how can integration at a supra-national level come about? The key thinkers represented in this volume stress that in order to understand integration beyond the nation state, we need new explanatory categories associated with deliberation because a supranational entity as the EU possesses far weaker and less well-developed means of coercion - bargaining resources - than do states. The most appropriate term to denote this is the notion of 'deliberative supranationalism'. This pioneering work, headed by major writers such as Habermas, Schlesinger and Bellamy, brings a new perspective to this key issue in contemporary politics and political theory.

Inspector Konrad Sejer heads up the investigation into a brutal murder after the battered body of a woman is found outside of the town of Elvestad on the same day that the townspeople are expecting to meet the new Indian bride of local bachelor Gunder Jomann, who unexpectedly has returned home married after a two-week trip to India. By the author of Don't Look Back. Reprint. An "impressive" and "gripping" Scandinavian mystery from an author who "succeeds in evoking sympathy for all her characters . . . [in a] fair-play whodunit" (Publishers Weekly). Inspector Sejer is hard at work again, investigating the brutal murder of a woman who lived alone in the middle of the woods. The chief suspect is another loner, a schizophrenic recently escaped from a mental institution. The only witness is a twelve-year-old boy, overweight, obsessed with archery, and a resident at a home for delinquents. When a demented man robs a nearby bank and accidentally takes the suspect hostage, the three misfits are

drawn into an uneasy alliance. Shrewdly, patiently, as is his way, Inspector Sejer confronts a case where the strangeness of the crime is matched only by the strangeness of the criminals, and where small-town prejudices warp every piece of information he tries to collect. Fossum once again provides extraordinary insight into marginalized lives and richly evokes the atmosphere she captured so brilliantly in Don't Look Back. Praise for Karin Fossum: "A superb writer of psychological suspense." —New York Times "Sejer is a beautifully created character, a thoughtful, lonely man with great empathy." —Publishers Weekly "With sharp psychological insight and a fine grasp on police procedure, Fossum is easily one of the best new imports the genre has to offer." —The Baltimore Sun "A truly great writer and explorer of the human mind." —Jo Nesbo, New York Times bestselling author of the Harry Hole series "Fossum . . . writes like Ruth Rendell with the gloves off." —Kirkus Reviews A latest installment in the series that includes The Water's Edge finds Inspector Konrad Sejer confronting his own fears and memories while investigating the work of a serial killer who is throwing his victims into local Scandinavian lakes. 20,000 first printing.

The Fireside Cook Book is designed for people who are not content to regard food just as something one transfers periodically from plate to mouth. It is for those who recognize that a simple family meal (as well as a dress-up dinner party) can be a pleasure and a special event. The wide variety of I-can't-wait-to-try-it dishes in the book are presented according to a new and different theory. You will find here no attempt to overwhelm the cook with all the recipes ever concocted. Instead, you will find clear, easy-to-follow instructions for the basic preparation of every food, followed in each case by fascinating variations. The basic recipes and variations add up to 1,217 tested dishes -- simple enough for the novice, delicious enough for the most meticulous master chef, complete enough for the most imaginative menus without a repetition. A detailed chapter is devoted to the art of outdoor cookery, another to the preparation of hors d'oeuvres, cocktail snacks, and supper snacks. There is an entire section of suggested menus subdivided into cold weather meals and summer doldrum hints. There is also a complete section on wines and liquors. The 36 full-color pictures and the nearly 400 other color pictures are themselves full of helpful invention. Handsome double-page spreads employ visual-aid methods to give practical details about, and special uses of, cuts of meat, varieties of wine, and types of fish. Here, in

short, is a book that is an indispensable addition to every American home in which good food is appreciated. It is a book to use constantly, to pore over with delight, and give to all friends from whom you can reasonably expect a future dinner invitation. This is a core text for graduate-level Comparative Education courses. With its cross-cultural, issues-oriented approach, Comparative Education introduces K-12 educational systems worldwide. Readers are invited to consider current educational issues both at home and abroad, while developing global perspectives and skills of comparative inquiry to use their own reflective classroom teaching. Chapters on theory in comparative education, frameworks for analyzing educational issues, and globalization's implications for education explore several key issues in depth: purposes of schooling, educational access and opportunity, education accountability and authority, and teacher professionalism. This book takes an issues-based approach rather than a country-based approach. A major purpose of this book is to widen the field of comparative education's influence by articulating the relevance of comparative education to include a larger, practitioner-oriented audience.

The European Union is often attacked for its 'democratic deficit', namely its deficiencies in representation, transparency and accountability, as well as its lack of popular support. Can these shortcomings be counteracted by the development of a viable European public sphere? This book assesses the possible

formation of a communicative space that might enable and engender the creation of a transnational or a supranational public. The contributors consider the EU's democratic credentials and how well it communicates, and they also evaluate the major institutions and their links to general publics. *The European Union and the Public Sphere* emphasizes a 'deliberative democratic' perspective on the public sphere, addressing some key questions: • What are the prospects for a European public sphere? • Should we think in terms of the EU having a single public sphere, or are overlapping public spheres a more viable option? • What do this book's findings on the question of the public sphere tell us about the EU as a political entity? Students and scholars of European democracy, political communication, and the politics of institutions will all be greatly interested by this book.

Don't Look Back is the second novel in Los Angeles Times Book Prize-winning author Karin Fossum's Inspector Sejer mystery series. "Sejer belongs alongside the likes of Adam Dalgliesh and Inspector Morse—a gifted detective and troubled man."—*Boston Globe* At the foot of the imposing Kollen Mountain lies a small, idyllic village, where neighbors know neighbors and children play happily in the streets. But when the body of a teenage girl is found by the lake at the mountaintop, the town's tranquility is shattered forever. Annie was strong, intelligent, and loved by everyone. What went so terribly wrong? Doggedly, yet subtly, Inspector Sejer uncovers layer upon layer of distrust and lies beneath the town's seemingly perfect façade. "Psychologically astute, subtly horrifying."—*New York Times Book Review* "Build[s] to a heart-stopping conclusion."—*Entertainment Weekly* This book makes a distinctive contribution to the crucial debate on the European Union (EU)'s present and future development. It systematically examines how the range of crises and challenges over the last decade have transformed the EU and relates those findings to the discussion of an increasingly differentiated EU. It argues that the post-crisis EU shows clear signs of becoming a segmented political order with in-built biases and constraints. The book spells out the key features of such an order in ideational and structural terms and shows how it more concretely manifests itself in the EU's institutional and constitutional make-up and in how member states constrain and condition EU action. Different states impose different types of constraints, as is underlined through paying explicit attention to the Visegrád countries. This book will be of key interest to scholars and students of EU

politics/studies, European integration and politics, East European politics and foreign policy. Understand the theory, design and applications of the two principal candidates for the next mainstream semiconductor-industry device with this concise and clear guide to FD/UTB transistors. • Describes FD/SOI MOSFETs and 3-D FinFETs in detail • Covers short-channel effects, quantum-mechanical effects, applications of UTB devices to floating-body DRAM and conventional SRAM • Provides design criteria for nanoscale FinFET and nanoscale thin- and thick-BOX planar FD/SOI MOSFET to help reduce technology development time • Projects potential nanoscale UTB CMOS performances • Contains end-of-chapter exercises. For professional engineers in the CMOS IC field who need to know about optimal non-classical device design and integration, this is a must-have resource. “A truly great writer and explorer of the human mind.” — Jo Nesbø “What grips readers is the enormous amount of emotion [Fossum] works up as we get closer and closer to reliving the murderous event in question . . . Hell Fire is close to heartbreaking, and there are not many novels, thrillers or otherwise, you can say that about.” — Los Angeles Times A gruesome tableau awaits Inspector Konrad Sejer in the oppressive summer heat: a woman and a young boy lay dead in a pool of blood near a dank trailer. The motivation behind the deaths of Bonnie Hayden and her five-year-old son, Simon, is mysterious—there is no sign of robbery. Who would brutally stab a defenseless woman and her child? In a parallel story, another mother, Mass Malthe, navigates life with her adult son, Eddie. It’s a relationship some would call too close, since Eddie’s father, a man he obsesses over, abandoned them many years ago. As Sejer searches for the truth behind the seemingly senseless killings, Hell Fire deftly probes why we lie to those closest to us, and what drives people to commit the most horrific of crimes. “There’s always something dark hovering on the edge of the page, something about getting what you wish for and the crushing irony when that gift proves your undoing.” — New York Times Book Review This collection of articles studies the development of crime fiction in Denmark, Finland, Iceland, Norway and Sweden since the 1960s, offering the first English-language study of this widely read and influential form. Since the first Martin-Beck novel of Maj Sjöwall and Per Wahlöö appeared in 1965, the socially-critical crime novel has figured prominently in Scandinavian culture, and found hundreds of millions of readers

outside Scandinavia. But is there truly a Scandinavian crime novel tradition? Scandinavian Crime Fiction identifies distinct features and changes in the Scandinavian crime tradition through analysis of some of its most well-known writers: Henning Mankell, Stieg Larsson, Anne Holt, Liza Marklund, Leena Lehtolainen, and Arnaldur Indriðason, among others. Focusing on Scandinavian crime fiction's snowballing prominence since the 1990s, articles zoom in on the transformation of the genre's social criticism, study the significance of cultural and geographical place in the tradition, and analyze the cultural politics of crime fiction, including struggles over gender equity, sexuality, ethnicity, history, and the fate of the welfare state. Scandinavian Crime Fiction maps out the contribution of Scandinavian crime writers to contemporary European culture and society, making the volume valuable to scholars and the interested public. The author writes in the tradition of C.H. Turner, G.D. Kilpatrick and J.K. Elliott, and attempts a reconstruction of the Greek text of Jude according to the rationale of thoroughgoing eclecticism. The aims of his study are to apply an eclectic approach to the resolution of textual problems in Jude, and to determine the extent to which the text of Jude published in the United Bible Societies' Greek New Testament (GNT4) is a product of the eclectic ideal. In this work, eclecticism is defined in detail, distinctions being made between eclectic generalism, rational criticism, and thoroughgoing eclecticism. Each of 95 variation units is analysed individually and the apparatus provided for each unit shows as much variation as possible in a compact form. Inspector Sejer investigates the delivery of a threatening postcard that coincides with the discovery of a child who was found covered in blood but unharmed in her stroller. A missing child mystery drives this "dark, intense . . . impossible-to-put-down investigation. . . . Essential reading for fans of Scandinavian crime fiction" (Booklist, starred review). Ida Joner gets on her brand-new bike and sets off toward town. A good-natured, happy girl, she is looking forward to her tenth birthday. Thirty-five minutes after Ida should have come home, her mother starts to worry. She phones store owners, Ida's friends—anyone who could have seen her. But no one has. Suspicion immediately falls on Emil Mork, a local character who lives alone and hasn't spoken since childhood. His mother insists on cleaning his house weekly—although she's sometimes afraid of what she might find there. A mother's worst nightmare in either case—to lose a child or to think a child

capable of murder. As Ida's relatives reach the breaking point and the media frenzy surrounding the case begins, Inspector Konrad Sejer is his usual calm and reassuring self. But he's puzzled. And disturbed. This is the strangest case he's seen in years. Praise for Karin Fossum: "A superb writer of psychological suspense." —*New York Times* "Sejer is a beautifully created character, a thoughtful, lonely man with great empathy." —*Publishers Weekly* "With sharp psychological insight and a fine grasp on police procedure, Fossum is easily one of the best new imports the genre has to offer." —*The Baltimore Sun* "No one can thoroughly chill the blood the way Karin Fossum can . . . will put you away, no questions asked." —*Los Angeles Times* "A truly great writer and explorer of the human mind." —Jo Nesbo, *New York Times* bestselling author of the *Harry Hole* series "Fossum . . . writes like Ruth Rendell with the gloves off." —*Kirkus Reviews*

Helene Tursten's explosive new series features Detective Inspector Embla Nyström, a sharp, unforgiving woman working in a man's world. When one of her peers is murdered during a routine hunting trip, Embla must track down the killer while confronting a dark incident from her past. Twenty-eight-year-old Embla Nyström has been plagued by chronic nightmares and racing thoughts ever since she can remember. She has learned to channel most of her anxious energy into her position as Detective Inspector in the mobile unit in Gothenburg, Sweden, and into sports. A talented hunter and prizewinning Nordic welterweight, she is glad to be taking a vacation from her high-stress job to attend the annual moose hunt with her family and friends. But when Embla arrives at her uncle's cabin in rural Dalsland, she sees an unfamiliar face has joined the group: Peter, enigmatic, attractive, and newly divorced. And she isn't the only one to notice. One longtime member of the hunt doesn't welcome the presence of an outsider and is quick to point out that with Peter, the group's number reaches thirteen, a bad omen for the week. Sure enough, a string of unsettling incidents follow, culminating in the disappearance of two hunters. Embla takes charge of the search, and they soon find one of the missing men floating facedown in the nearby lake. With the help of local reinforcements, Embla delves into the dark pasts of her fellow hunters in search of a killer. The collection of essays reviews, explores, and reports state-of-the-art autoimmunity issues with a cause and effect relationship. It provides a comprehensive presentation of immunity and autoimmunity and their connection to related diseases, current trends, data and

possible future developments in health sciences. As such, it represents a unique resource for medical educators, medical practitioners and academics. The Routledge Handbook of Differentiation in the European Union offers an essential collection of groundbreaking chapters reflecting on the causes and consequences of this complex phenomenon. With contributions from key experts in this subfield of European Studies, it will become a key volume used for those interested in learning the nuts and bolts of differentiation as a mechanism of (dis)integration in the European Union, especially in the light of Brexit. Organised around five key themes, it offers an authoritative "encyclopaedia" of differentiation and addresses questions such as: How can one define differentiation in the European Union in the light of the most recent events? Does differentiation create more challenges or opportunities for the European Union? Is Europe moving away from an "ever closer Union" and heading towards an "ever more differentiated Union", especially as leading political figures across Europe favour the use of differentiation to reconcile divergences between member states? This handbook is essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in, and actively concerned about, research in the study of European integration. As European differentiation is multifaceted and involves a wide range of actors and policies, it will be of further interest to those working on countries and/or in policy areas where differentiation is an increasingly relevant feature. In this tense and twisty latest from Norway's maven of crime, time shifts between Inspector Sejer's interrogation of the accused Ragna Reigel and the shocking events that led up to her arrest. How did this lonely, quiet woman come to kill a man--or did she? How did a lonely, quiet woman come to kill a man--or did she? Ragna Riegel is a soft-spoken woman of routines. She must have order in her life, and she does, until one day she finds a letter in her mailbox with her name on the envelope and a clear threat written in block capitals on the sheet inside. With the arrival of the letter, and eventually others like it, Ragna's carefully constructed life begins to unravel into a nightmare--threatened by an unknown enemy, paranoid and unable to sleep, her

isolation becomes all the more extreme. Ragna's distress does culminate in a death, but she is the perpetrator rather than the victim. The Whisperer shifts between Inspector Sejer's interrogation of Ragna and the shocking events that led up to her arrest. Sejer thinks it is an open-and-shut case, but is it? Compelling and unnerving, The Whisperer probes plausible madness in everyday life and asks us to question assumptions even in its final moments. Eva is walking by the river with her seven-year-old daughter when they catch sight of a man's body in the water. Eva tells her daughter to wait while she calls the police, but when she reaches the phone box she doesn't call them. Instead she phones her father, and makes no mention of her discovery. When the body is eventually found, it soon becomes clear to Inspector Sejer and his team that this was no accidental drowning – the man was the victim of a very violent killer. But the trail has gone cold. Until, one night, Eva receives a phone call...
