*How to Build a Bobber on a Budget* Nov 26 2022 In the old days all a person needed to build a killer custom motorcycle was a bike, a set of tools, a little know-how, and a creative vision. But with the rise of the high-dollar, haute moteur Gucci choppers, the true custom bike has gotten out of most riders'™ reach, right? Dead wrong. In this book Jose de Miguel, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can turn odds and ends found around the shop into one-off motorcycle parts--and make a cheap, run-of-the-mill custom build into a drop-dead show stopper. Following de Miguel's™ lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the bobber of his dreams for less than the price of a new bike.

*How to Build an Old Skool Bobber* May 09 2021 Old Skool is kool. No theme bikes here, learn how to build a real American motorcycle based on a Panhead, Shovelhead or Evo engine. Don't buy expensive new parts, build your own bobber or chopper from mix-and-match swap-meet parts. Written by Kevin Baas, the Kennedy High School shop teacher with the Build-a-Chopper class, this book takes a back-to-basics approach to motorcycle assembly. As Kevin says, if you can't buy it cheap, adapt it, and if you can't adapt it, build it from scratch. The author explains which engines fit which frames, and which transmission and primary drive is the best fit behind a particular V-Twin. The back half of the book includes three start-to-finish assembly sequences utilizing early and early-style engines, drivetrains and components. This 144 page book uses over 350 color images to illustrate kool parts and even cooler motorcycles.
