Intermittent Fasting Made Easy is the ordinary person's best practice guide to doing intermittent fasting optimally, effectively, and safely, written by top nutrition and fitness expert and YouTube sensation Thomas DeLauer. The first edition, released in 1995, was lauded by seasoned practitioners and beginners alike. And no wonder. While most of the early English-language books on feng shui were dauntingly mystical or relied on complex calculations or culturally specific design practices, Feng Shui Made Easy took a more holistic approach, clearly explaining the fundamentals while guiding readers on an inner journey of understanding. Thoughtfully written and beautifully illustrated, the book is structured around an "architecture of consciousness" that is really the inner landscape. The book explores each "house" of the bagua—the chart representing one's journey through life; relationships with parents, loved ones, and community; creativity; spirituality; and connectedness to the source of life—and the symbolism of the corresponding I Ching trigram. Feng Shui Made Easy helps readers discover the nature of these connections, as well as learn what obstructions must be removed to change fixed patterns of behavior and restore balance, harmony, and inner peace—a process that, when combined with external adjustments, results in increased success and lasting change in all areas of life. This revised edition expands on the author's intuitive approach with new sections on health, children's environments, and ecological concerns and sustainable practices. The author also corrects misconceptions about feng shui and uses fascinating case studies to share valuable insights he gained from interactions with his clients and readers. Fresh insights, practical, easy entry, and immense delight!" — Chungliang Al Huang, president-director, Living Tao Foundation, and co-author with Alan Watts of Tao: The Watercourse Way May you live during interesting times: so goes an ancient Chinese blessing—or some say curse. That wish has come true for us. Now what? In this radically illuminating book, Alan Cohen delves into one of the world's most venerated wisdom texts for answers and brings the lofty and enigmatic concepts of the Tao Te Ching down to earth in fresh, easy-to-grasp language with practical, personal examples we can use to uplift our daily lives. Here Alan Cohen calls forth the ancient verses around themes that are central to our modern lives —from love to work to the lessons we learn from pain. Then he brings each message to life in short vignettes where he imagines himself a student of Lao Tse and interacts with the master directly and intimately. He invites you to join the ancient sage and the contemporary seeker as they wend their way through the challenges and triumphs of the same journey you're taking yourself. Why You Shouldn't Choose This Book It is not that peace is not. It is not that peace is rare. Heaven is precious, yes. However, it is not rare. In fact heaven, happiness, peace, joy is so common. It is so easily available to us. For aeons we have had the knowledge of our truth. Knowledge of our heaven. But we choose not to be in heaven. We choose hell. There is a very good reason for that. Hell is ours. Heaven belongs to God. Hell belongs to us. In heaven, God rules; in hell, we do. So hell is dear to us it gives us our separation, our ego, our I am. An I am separate from reality, from nature. Hell gives us our responsibilities, our worries, our judgements, our control. So we choose to stay in hell and be responsible for our problems. In heaven, God is responsible for all problems, for all judgements. That we cannot allow. We love our judgements. So unless you are really tired of your hell, of your responsibilities, and of your ego, and if it is not hurting you yet do not buy this book. You, like humanity has done for aeons, will choose to ignore its truth. If ego is still giving you pleasure, stay there is nothing wrong with hell. It is just another reality, and it has its charms. The Reality Editor is a system based around the concept that physical objects may serve augmented reality web interfaces while communicating information about their state to the local environment. Its combination of an augmented reality web browser with an object messaging system leads to high usability and simplicity. In my contribution to the project, I reduce the difficulty of creating and controlling compelling augmented reality Internet of Things experiences using the Reality Editor. I simplify the creation process through three areas of work: creating reusable user interface components, designing an in-browser editor, and implementing a drag-and-drop in-app editor. My work on enhancing control takes two forms: developing an object memory system and integrating networked cameras. Finally, I improve the Reality Editor as a whole through a series of efforts targeting its documentation, performance, and reliability. A fascinating exploration of the history, development, and future of virtual reality, a technology with world-changing potential, written by award-winning journalist and author David Ewalt, stemming from his 2015 Forbes cover story about the Oculus Rift and its creator Palmer Luckey. You've heard about virtual reality, seen the new gadgets, and read about how VR will be the next big thing. But you probably haven't yet realized the extent to which this technology will change the way we live. We used to be bound to a physical reality, but new immersive computer simulations allow us to escape our homes and bodies. Suddenly anyone can see what it's like to stand on the peak of Mount Everest. A person who can't walk can experience a marathon from the perspective of an Olympic champion. And why stop there? Become a dragon and fly through the universe. But it's not only about spectacle. Virtual and augmented reality will impact nearly every aspect of our lives—commerce, medicine, politics—the applications are infinite. It may sound like science fiction, but this vision of the future drives billions of dollars in business and is a top priority for such companies as Facebook, Google, and Sony. Yet little is known about the history of these technologies. In Defying Reality, David M. Ewalt traces the story from ancient amphitheaters to Cold War military laboratories, through decades of hype and failure, to a nineteen-year-old video game aficionado who made the impossible possible. Ewalt looks at how businesses are already using this tech to revolutionize the world around us, and what we can expect in the future. Writing for a mainstream audience as well as for technology enthusiasts, Ewalt offers a unique perspective on VR. With firsthand accounts and on-the-ground reporting, Defying Reality shows how virtual reality will change our work, our play, and the way we relate to one another. Many people believe in the Power of Positive Thinking, but no one had succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences. To explain the connection, Joseph Donlan presented highly plausible theories in two preceding books. Each of these books presents a new paradigm of nature and couples it with a convincing explanation of how our right brain hemispheres have a unique ability to tap into the hidden domain of the metaphysical. This final book in the series also supports these premises; however, it does so at a higher, more condensed level so that readers with no background in science can gain enough information to appreciate the divergent worlds of physics and metaphysics and gain a view of nature that undeniably links mind to matter. Lucrative Reality Leaps Made Easy Provides Mindset Empowerment for Creating Reality Shifts & Accelerated Wealth. This resource includes empowering writings and a journal planner section. This book is designed to help you achieve one specific goal. It's not designed to give you the philosophies of conducting research. It's not designed to give you a background in a specific academic discipline or a specific topic. It's not designed to give you theory. It's designed specifically to instruct you in the practicalities of the writing process used to create strong, thorough, and potentially bulletproof literature reviews. This book is the culmination of years of research experience. It's also the culmination of several years of teaching writing and critical thinking to doctoral students. Although it began as a tool for doctoral students, it has been expanded to be useful for everyone from senior high school students through doctoral candidates working on developing their first literature review or a larger literature review than they normally develop. It has been created for everyone from academics to new business entrepreneurs with good ideas who are trying to write their first reviews to support the new idea they're proposing. Many people believe in the Power of Positive Thinking, but no one has succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences. To explain the connection, this book presents a new paradigm of nature and couples it with a convincing explanation of how our right brain hemispheres have a unique ability to tap into

the hidden domain of the metaphysical. To support this premise, the reader is lightly exposed to the divergent worlds of physics and metaphysics and is then introduced to a new view of nature that undeniably links mind to matter. Important to its charge, the new perspective makes the case that the future can only be created with thoughts. In the final analysis, the author brings his readers through the necessary steps to put this knowledge to work to help them create their own realities. Mazer teaches you to free yourself from the limiting beliefs that prevent you from achieving the abundance you deserve. She takes you step by step through the process of manifesting, so that you can signal to the universe that you're ready for good things to come your way.
