Domestic Violence Apr 21 2023 Domestic violence does not begin the day an adult heterosexual male decides to beat and batter an adult heterosexual female. Domestic violence is a complicated and multifaceted enigma that includes child, sibling, spousal, intimate partner, and elder abuse. Despite spending billions of dollars on domestic violence, the number of some categories of victims remains the same. The problem can be traced back to our very definitions of victim and abuse. Until we open our eyes to the blatant empirical evidence and come to some agreement on a basic platform, this pervasive crime will not diminish. *Domestic Violence: Intervention, Prevention, Policies, and Solutions* presents a rational and reasoned perspective that emphasizes evidence-based information rather than ideologically held beliefs. It challenges the effectiveness of existing policies and procedures and introduces 10 recommendations for change. The book summarizes many important federally sponsored reports and provides unique meta-analysis styled empirically based overviews of contemporary research and intervention efforts. It also supplies print and web-based national and state specific resources and references to studies and organizations that will be updated online. Topics addressed include historical and current explanations of battering behavior, the importance of the accurate and unbiased identification of victims, differences and the implications of those differences in reporting rape and sexual assault, and the understanding of risk factors. It considers the fallacy of ideological advocacy and presents legislation and policies in Colorado and California as cases in point. In particular the author explores the prevailing notion of the predominance of female victimization over male victimization. Injecting a voice of reason into a highly emotional debate, this outstanding volume clarifies our convenient delusions and allows us to re-appraise this sensitive issue and effect a positive and progressive outcome.

Solve Jul 24 2023 Many people are good at pointing out problems. What if God's people were among the few who are good at finding solutions? How would our world and our lives be different? This five-week study focuses on the person of Nehemiah in the Bible, who faced the difficult work of rebuilding the wall of Jerusalem after his people returned from exile. Confronted with this complicated task and the many dilemmas that came with it, Nehemiah chose not to dwell on his problems or to pursue his own answers. Instead, he sought God's solutions, following God's lead and trusting God's purposes. God's people today are called to do the same. In each chapter, Talbot Davis shows how Nehemiah's experiences mirror the problems we face, as individuals and as a society. As you read this book, you will hear God's call to be someone who finds solutions. You will see how you can follow in Nehemiah's footsteps, building up your life and the world around you. You will be challenged not to focus on problems, but to seek God's solutions and how you can help bring them about. This book is based on a sermon series Talbot Davis delivered at Good Shepherd United Methodist Church. Each chapter includes questions for reflection and discussion, a practical focus for the week, a closing prayer, and daily scripture passages to guide personal reading throughout the week.

My Children Alongside the Battlefield Mar 20 2023 This courageous memoir is a collection of war stories that give a glimpse into the life and trails of RET SFC Vicki, Davis. She recounts nearly 22 years of battling-on and off the field-to be the best soldier and mother she could be. This battle included combating external troubles such as financial hardships and domestic violence as well as inner conflict of a sexist system while fighting for her life in Iraq. SFC Davis could not have imagined how signing her life away at 18 would also impact her future children. Sacrificing her life to the all-consuming entity that is the United States Army was still not enough. SFC Davis tells the tales of love and laughter mixed with blood and silent tears that became her life story. While penning this memoir, she and her family faced the history of unspoken sexual abuse trauma, domestic violence, financial hardships, and the general disappointments they dealt with over the years. The chief of these hardships was the death of her oldest son. Humbly, she hopes this book can represent a token of appreciation to her children, to her fallen comrades, and to other female veterans who endured similar trails. This book is a tribute of gratefulness and a message to keep fighting the good fight.

Climate Change Oct 15 2022 It is the greatest environmental challenge of the 21st Century. But what do we truly know about global climate change? And what can we do about it? Most of the world's top scientists agree that emissions of carbon dioxide and other greenhouse gases from human activities such as industrial processes, fossil fuel combustion, and land-use changes are causing the earth to get warmer. Impacts of this warming may include damage to our coastal areas, accelerated rates of species loss, altered agricultural patterns, and increased incidences of infectious diseases. The effects of climate change - and efforts to mitigate climate change - could also have substantial economic ramifications. The book presents the latest research and analysis from prominent scientists, economists, academics, and policy-makers, including: "Tom Wigley" and "Joel Smith," who, along with other authors of the Science and Impacts chapter, explain the basic science of climate change, the growing evidence that human activities are changing our climate, and the impacts of these changes; "Eileen Claussen," "John Gummer," "Henry Lee," and other authors of the Global Strategies chapter, who describe what nations are or are not doing to address climate change, and the state of international climate talks; "Robert Stavins," "John Weyant," "Ev Ehrlich," and other economists, who explain why economic analyses of climate policy are conducted, why the projected costs of addressing climate change vary so widely among economic models, and how changes driven by today's economy can influence climate policy; "Gov. Jean Shaheen" and other authors of the Innovative Solutions chapter, who describe what state and local governments in the United States and multinational companies are doing to monitor and curb greenhouse gas emissions; and "Forest Reinhardt," who offers business leaders advice on steering their companies on a path that is healthy for business as well as the global climate.
