Death of an Inquisitor & Other Stories Sep 21 2020

Video Electronics Technology Jun 30 2021

The 9th Symbol Jan 18 2023 Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After...Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Using Information Technology 9e Complete Edition Sep 02 2021 The Williams, Using Information Technology, 9th edition utilizes a practical, applied approach to technology. This text is user-focused and has been highly updated including topics, pictures and examples. The Williams text contains less theory and more application to engage students who might be more familiar with technology. Continually published and updated for over 15 years, Using Information Technology was the first text to foresee and define the impact of digital convergence, the fusion of computers and communications. It was also the first text to acknowledge the new priorities imposed by the Internet and World Wide Web and bring discussion of them from late in the course to the beginning.

Today, it is directed toward the "Always On" generation that is at ease with digital technology, comfortable with iPhones, MySpace, Facebook, Twitter, Wikipedia, and the blogosphere, but not always savvy about its processes, possibilities, and liabilities. This 9th edition continues to address the two most significant challenges that instructors face in teaching this course: Trying to make the course interesting and challenging, and trying to teach to students with a variety of computer backgrounds. This text also correlates with SimNet Online, our online training and assessment program for the MS Office Suite and also computing concepts!

Using Information Technology Aug 25 2023

Pheromone Communication in Moths Apr 28 2021 Common among moths is a mate-finding system in which females emit a pheromone that induces males to fly upwind along the pheromone plume. Since the chemical pheromone of the domesticated silk moth was identified in 1959, a steady increase in the number of moth species whose pheromone attractants have been identified now results in a rich base for review and synthesis. Pheromone Communication in Moths summarizes moth pheromone biology, covering the chemical structures used by the various lineages, signal production and perception, the genetic control of moth pheromone traits, interactions of pheromones with host-plant volatiles, pheromone dispersal and orientation, male pheromones and courtship, and the evolutionary forces that have likely shaped pheromone signals and their role in sexual selection. Also included are chapters on practical applications in the control and monitoring of pest species as well as case studies that address pheromone systems in a number of species and groups of closely allied species. Pheromone Communication in Moths is an invaluable resource for entomologists, chemical ecologists, pest-management scientists, and professionals who study pheromone communication and pest management.

Jack the Puppy Jun 18 2020

Introductory Statistics May 22 2023 Introductory Statistics follows scope and sequence requirements of a one-semester introduction to statistics course and is geared toward students majoring in fields other than math or engineering. The text assumes some knowledge of intermediate algebra and focuses on statistics application over theory. Introductory Statistics includes innovative practical applications that make the text relevant and accessible, as well as collaborative exercises, technology integration problems, and statistics labs. Senior Contributing Authors Barbara Illowsky, De Anza College Susan Dean, De Anza College Contributing Authors Daniel Birmajer, Nazareth College Bryan Blount, Kentucky Wesleyan College Sheri Boyd, Rollins College Matthew Einsohn, Prescott College James Helmreich, Marist College Lynette Kenyon, Collin County Community College Sheldon Lee, Viterbo University Jeff Taub, Maine Maritime Academy

Forensic Ballistics in Court May 10 2022 Forensic Ballistics in Court:

Interpretation and Presentation of Firearms Evidence is an accessible introduction to firearms and ballistics evidence and how this is analysed and presented as evidence in a court of law. The book approaches the subject in terms of the realities of case work, opening with a clear and illustrated explanation of the correct nomenclature for various weapon types and their parts. Ammunition is also extensively covered, again with annotated illustrations. Basic external and terminal ballistics, wounding capabilities are likewise covered to give an overview of the subject. A key aspect of the book covers the theory and philosophy behind striation matches and the associated statistics, how positive matches should be peer reviewed and the importance accreditation has on this subject. Gunshot residue formation and identification and the various methods used in its analysis are reviewed in depth. This includes a critical examination of the pros and cons of each type of examination and the evidential weight which can be applied to each method. Accessible and reader-friendly introduction to firearms and ballistics. Clarifies the limitations of firearms evidence. Extensive use of global case-studies throughout. Focus on the interpretation and assessment of the weight of firearms/ballistics evidence presented at court. Covers the importance of witness and accused statements and their interpretation in relation to the investigation under review. Includes coverage of gunshot residue collection, examination and interpretation and the potential for contamination of GSR samples. Includes numerous real life case studies that the author has dealt with over the past 45 years. Takes an applied approach to the subject.

The PTA Magazine Mar 08 2022

33 Snowfish May 30 2021 "Adam Rapp's brilliant and haunting story will break your heart. But then his words will mend it. . . . Absolutely unforgettable." - Michael Cart On the run in a stolen car with a kidnapped baby in tow, Custis, Curl, and Boobie are three young people with deeply troubled pasts and bleak futures. As they struggle to find a new life for themselves, it becomes painfully clear that none of them will ever be able to leave the past behind. Yet for one, redemption is waiting in the unlikeliest of places. With the raw language of the street and lyrical, stream-of-consciousness prose, Adam Rapp hurtles the reader into a world of lost children, a world that is not for the faint of heart. Gripping, disturbing, and starkly illuminating, his hypnotic narration captures the voices of two damaged souls - a third speaks only through drawings - to tell a story of alienation, deprivation, and ultimately, the saving power of compassion.

Radar Instruction Manual Jun 23 2023 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's

three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell, Assistant Secretary for Maritime Affairs

Collaborative Statistics Feb 19 2023 Collaborative Statistics is intended for introductory statistics courses being taken by students at two- and four-year colleges who are majoring in fields other than math or engineering. Intermediate algebra is the only prerequisite. The book focuses on applications of statistical knowledge rather than the theory behind it. Barbara Illowsky and Susan Dean are professors of mathematics and statistics at De Anza College in Cupertino, CA. They present nationally on integrating technology, distance learning, collaborative learning, and multiculturalism into the elementary statistics classroom.

Java Programming: A Practical Approach Jul 20 2020

A Life Less Ordinary Nov 23 2020 He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. Normally, these two would never meet, but a higher power has different plans for both of them. The major motion picture from 20th Century Fox starring Ewan McGregor, Cameron Diaz and Holly Hunter hits the box office in October.

Insect Sex Pheromone Research and Beyond Oct 27 2023 This book provides a complete overview of cutting-edge research on insect sex pheromones and pheromone communication systems. The coverage ranges from the chemistry, biosynthesis, and reception of sex pheromones to the control of odor-source searching behavior, and from molecules to the application of research findings to robotics. The book both summarizes the progress of studies conducted using *Bombyx mori* and several groups of moths and reviews sex pheromones of some non-lepidopteran insect groups of agricultural importance. Attention is drawn to recent findings on elaborate neural information processing in the brain in male moths and to the importance of olfactory receptors specifically tuned to sex pheromone molecules. Featuring contributions from leading experts on the topic, this book will be a unique and valuable resource for researchers and students in the fields of entomology, chemical ecology, insect physiology and biochemistry, evolution, biomimetics, and bioengineering. In addition to researchers, general insect lovers will find the book fascinating for its descriptions of the marvelous abilities of insects and the underlying mechanisms involved.

Microsoft Exchange 2000 Infrastructure Design Nov 16 2022 Microsoft Exchange

2000 Infrastructure Design explains from a system designer's and administrator's perspective Microsoft's Active Directory and its interaction with Exchange 2000, details issues concerned with migration to Exchange 2000, and outlines the specific technology and design issues relating to connectivity with Exchange 2000. Readers will learn to use these technologies to seamlessly co-exist with their current environment, migrate to a native Exchange 2000 environment, and connect to the Internet as well as to other messaging systems. The book's blend of expert instruction and best practices will help any organization create optimal system designs and configurations to support different technical and business scenarios. McCorry and Livengood are experts in Microsoft technologies from Compaq, the world's leading integrator of Exchange systems. In Microsoft Exchange 2000 Infrastructure Design, they spell out the key technologies, features, and techniques IT professionals must master to build a unified and robust Exchange 2000 messaging service. This book details the framework organizations must put in place to most effectively move to Exchange 2000. Detailed explanations of Active Directory integration with Exchange 2000, migration to Exchange 2000 from another system and Exchange 2000 transport, connectivity, and tools Gives readers the benefit of authors' extensive experience Unique description of the software "plumbing" organizations must master to move to Exchange 2000

Epilepsy Board Quick Review Jul 12 2022 Engel's Epilepsy Board Quick Review: Selected Tables and Figures from Seizures and Epilepsy will utilize 86 tables and 47 black and white figures from the "parent book" to provide a quick guide for anyone preparing for the boards. In addition to serving as a board-review guide, this will also be a handy pocket guide for any physician interested in a quick reference to drug tables, signs and symptoms, and other unusual facets of child or adult presenting with seizures. Seizures and Epilepsy, Second Edition has quickly reasserted itself as a modern classic and comprehensive textbook covering a broad range of both basic and clinical epileptology. Singly authored by Dr. Engel, this must-read text appeals to basic scientists who are interested in learning more about clinical epileptology, as well as clinicians who would like to understand more about fundamental mechanisms will find this text useful. This quick reference guide retains all of the benefits of the classic, in a pared down and easily manageable guide.

Active Close Binaries Oct 03 2021 Since the 1970s symposia or colloquia devoted to recent research on close binaries have been held around the world almost annually. At meetings of the General Assembly of the International Astronomical Union this topic has also been discussed in detail at presentations in various commission meetings and also as invited talks by leading astronomers in the field. In recent years, fundamental changes have taken place in the study of close binaries due to the improvements in observational techniques, extension of observations from X-ray to radio regions of the

electromagnetic spectrum, and advances in theoretical studies. For more than a decade, a group of astronomers at Ege University Observatory has been concentrating on active close binaries with particular emphasis on the behaviour of the light curves of chromospherically active systems. Thus, we decided to organize an international meeting in Western Anatolia, where this part of Turkey had been the cradle for great developments in science during antiquity.

KUİjadasi, located only minutes away from Ephesus, one of the seven wonders of the world, was selected to be the meeting site. Close binary systems constitute a very rich source of information about the physical properties of the component stars. Some systems are eclipsing variables, where periodic recurrences of eclipses are observed as comparatively brief decreases in the total brightness of the binary system. Precise methods of photometric observations make it possible to obtain the light variations of these systems because of eclipses and other phenomena.

Statistics Using Technology, Second Edition Jul 24 2023 Statistics With Technology, Second Edition, is an introductory statistics textbook. It uses the TI-83/84 calculator and R, an open source statistical software, for all calculations. Other technology can also be used besides the TI-83/84 calculator and the software R, but these are the ones that are presented in the text. This book presents probability and statistics from a more conceptual approach, and focuses less on computation. Analysis and interpretation of data is more important than how to compute basic statistical values.

Tube Tester I-177Apr 09 2022

Olfactory Concepts of Insect Control - Alternative to insecticides Sep 26 2023 Evolution gave rise to a prominent insect diversity at every level of ecological niche. Since then, hordes of insects have threatened human and cattle health as well as most of all green lands and agricultural crops. Now, the insect problem expands from many mutant forms of yellow dengue fever mosquitoes to highly-resistant larvae of most all various phytophagous species. The tremendous expansion of insects is due not only to an increasing resistance capacity to insecticides, but also to a strong capacity for adapting to different climate and environmental changes, including global warming. Obviously insects display a number of rudimentary systems to build an extremely efficient organism to survive in a changing world. In many species, one pheromone molecule is enough to trigger mating behavior. Therefore, insects have become crucial models not only for evolutionary studies, but also for understanding specific mechanisms underlying sensory-based behaviors. Most of insect species such as ants, beetles, cockroaches, locusts, moths and mosquitoes largely rely on olfactory cues to explore the environment and find con-specifics or food sources. A conglomerate of renowned international scientific experts is gathered to expose the insect problem on the various continents of the planet and propose an alternative to the use of toxic insecticides. Sex pheromones, specific chemical

signals necessary for reproduction, and pheromone detection in insects are described with full details of the olfactory mechanisms in the antennae and higher centers in the brain. Thus, new synthetic pheromones and/or plant odors with specific molecular target sites in the insect olfactory system are proposed for sustainable development in agricultural and entomological industries. Disrupting insect pheromone channels and plant odor detection mechanisms is solemnly envisioned as a unique way to control invasive insect pest species while preserving human and environment safety.

Hot Works Permit Nov 04 2021 Easy to use hot work permits log to monitor and keep records of all your hot work permits. Product information: Introductory page on the first page to personalize log. Index Pages to keep track of Log. Date Permit No Contractor Address Phone No Email Location Work Description Permit Issue Date Permit Expiry Date Equipment(s) To Be Used Work Start Date Work Finish Date Notes. Extra notes pages for quick access write-in and other information. 8.5" x 11" (20.32cm x 25.4cm). Thick white acid free paper of 110 pages to reduce ink bleed-through. Glossy paperback cover. Great for professional and personal use. Available in different cover options. For more related log like Construction logs, Payroll Management, Real Estate Customer Management Log Book, To Do List, Events Planner Calendar, Appointment Planner and other essential logbooks or planners in different sizes, kindly visit our amazon author page; Jason Journals to find the rest of our selection. Thank you.

Multinational Finance Dec 17 2022 Deep coverage and rigorous examination of international corporate finance Multinational Finance offers an advanced exploration of international corporate finance concepts and operations. Despite its status as one of the most rigorous texts on the topic, this book remains accessible and readable without sacrificing depth of coverage. Sidebars, key terms, essays, conceptual questions, and problems with solutions help aid in the learning process, while suggested readings and PowerPoint handouts reinforce the material and offer avenues for further exploration. This new sixth edition includes Excel templates that allow students to use real-world tools in a learning environment, and the modular structure facilitates course customization to individual objectives, interests, and preparatory level. The emphasis is on the basics of financial management, but coverage includes unique chapters on treasury management, asset pricing, hedging, options, and portfolio management in addition to traditional finance topics. International finance is a diverse field with myriad specialties and a vast array of possible interests. This book allows students to view the field through the lens of a financial manager with investment or financial options in more than one country to give them a practical feel for real-world application. Understand the nature and operations of international corporate finance Evaluate opportunities, costs, and risks of multinational operations See beyond the numbers and terminology to the general

principles at work Learn the markets, currencies, taxation, capital structure, governance, and more Comprehensive, adaptable, and rigorously focused, this book gives students a solid foundation in international corporate finance, as well as a sound understanding of the tools and mechanics of the field. Designed for MBA and advanced undergraduate courses, Multinational Finance provides the deep coverage so essential to a solid education in finance.

When It Rains, It Pours Oct 15 2022 The Unlikely Adventures of Nogi & Monjo wants to be the most reasonable guide to survive unreasonable situations! Raising children is not easy. Raising GOOD children is not easy. But one thing parents sometimes forget, growing up is equally hard. Maybe harder. Today we live in such a complex world, with so many conflicting values and ideas. It can be very confusing for little souls who can't even decide who's scarier: the monster under their bed or the school bully. We believe some values are gold. Values like honesty, perseverance, open-mindedness, self-discipline, personal responsibility and caring. And we believe no child is too young to learn these. Not when they're introduced with beautiful pictures and moving stories about an adorable little dragon and his princess-astronaut-pastry chef companion.

Soul Love Connections Sep 14 2022 Edward R. Barstone - Through a friend following her psychic guidance I am introduced to another psychic; a potential boyfriend. A dating situation and ensuing love develops. I feel finally I have found a soulmate who is an equal partner that can relate on the multi-levels of awareness a psychic functions on. As the story plays out I once again am faced with a character type who is like my mother. I use my psychic abilities to sort through deception that is invisible to the naked eye. Edward is faced with two very different probable futures based on his choice of woman. Bo - I receive a phone call letting me know a former boyfriend has recently died. The reader is taken through my experience of reconnecting with Bo's family and spirit. After experiencing soul love as intensely as I have ever felt I build a channel, ask for his guides to come through and send Bo's spirit into the light...he awaits for me at heavens door where I told him he could be my king once more. Shadow - After being misdiagnosed and given a drug that was toxic to her my cat Shadow nearly dies. My psychic channel is clear with guidance coming through in various forms and I begin to take note of "coincidences", dreams, chance meetings and strong psychic guidance. I change treatment approach. All local traditional vets feel I am killing my cat by choosing the treatment plan that goes against "orthodox procedure" in treating hyperthyroidism. The drug Shadow is put on creates a strain on her heart at the same time the hyperthyroidism is still at a deadly (9.1) level. I show the reader through the use of God source energy and an energy of love how I work with the cat as energy and lead her through the medication stabilization time. She adjusts to the high dosage of the very potent drug prednisone. The "key" that God sent me proves to be the right one and Shadow defies veterinary science. I am a psychic and teacher of psychic ability

development. It is my belief that every individual having a desire to develop psychic abilities has the potential to do so. Almost everyone at some time in their life has reached out to something beyond themselves and asked for assistance. Higher guidance comes through to people by change in thought perspective, new ideas, symbols that appear in the mind's eye, strong feeling impressions or even repeating song phrases within the mind. "Coincidences" that happen in life after requests for guidance are made are often not consciously recognized as answers to requested guidance. Through my writing and life experience I hope to make people more aware of the subtleties of what is going on around them. Everyone has the potential to quiet their minds, set a quiet meditative space and receive feedback after requesting assistance from whatever higher source they believe is available. Soul Love Connections illustrates practical examples of guided imagery, visualization, and demonstrates the use of love as energy to create a healing channel. It is my sincere hope my readers will integrate some of these techniques into their own lives. If broken down into step-by-step examples EVERY person can receive and interpret psychic guidance, empower themselves and enrich their lives. I believe we have great ability to influence outcome and create harmony, healing and balance in our lives through the use of "God source" energy, angels, guides, etc. This, of course needs to be combined with the understanding of how our thoughts, feelings and beliefs are manifesting our current life experience. In this book you will be taken on three journeys of love, exploration and growth. I share these experiences to demonstrate the multi-levels of depth there is to the energy of love... COMING IN FEBRUARY 2002 Life Without Illusion

Disneyland's Hidden Mickeys Mar 20 2023 Camouflaged images of Mickey Mouse are hidden all around the Disneyland Resort. Searching for them adds extra fun for adults and children visiting Disneyland. In this new edition, "Hidden Mickey Guy" Barrett adds the latest Hidden Mickey sightings in Disneyland Resort's theme parks and resort hotels and everywhere else on Disneyland property.

Essentials of Statistics Oct 23 2020 From SAT scores to job search methods, statistics influences and shapes the world around us. Marty Triola's text continues to be the bestseller because it helps students understand the relationship between statistics and the world, bringing life to the theory and methods. Essentials of Statistics (a briefer version of Elementary Statistics-see below for the full series) raises the bar with every edition by incorporating an unprecedented amount of real and interesting data that will help instructors connect with students today, and help them connect statistics to their daily lives. The Fifth Edition contains more than 1,585 exercises, 89% of which use real data and 86% of which are new.

Nurse Notebook Jan 26 2021 The book has 120 white pages with dot matrix that will help you while writing and sketching but at the same time gives you enough freedom for notes and other ideas. It comes in handy format 6x9 inches

(equivalent to DIN A5). The Nurse Notebook is for those who have a Fable for Medicine or Cure. The Nurse Notebook is versatile, notepad inserts, personal achievements, birthday appointments, your thoughts or other notes of your choice. Use it on holiday as a holiday diary or as a gratitude diary. No matter if motivation, tokens, appointments or notes with this space-saving notebook no wish remains open. For leisure, hobbies or work, this small but fine notebook is always and everywhere suitable for things, ideas or thoughts that want to be noted, e.g. as a thought support or for organizing tasks. Whether for yourself or as a gift for men and women, partners, friends, mums and dads or work colleagues. Especially suitable for birthdays, for Christmas or just as a nice attention for your loved one.

Drawing and Painting Fantasy Figures Apr 21 2023 There are over 50 stunning examples featured, offering inspiration and guidance to aspiring fantasy artists.

Handbook of Firearms and Ballistics Aug 01 2021 The updated second edition of Handbook of Firearms and Ballistics includes recent developed analytical techniques and methodologies with a more comprehensive glossary, additional material, and new case studies. With a new chapter on the determination of bullet caliber via x-ray photography, this edition includes revised material on muzzle attachments, proof marks, non-toxic bullets, and gunshot residues. Essential reading for forensic scientists, firearms examiners, defense and prosecution practitioners, the judiciary, and police force, this book is also a helpful reference guide for undergraduate and graduate forensic science students.

Exhibit A Dec 25 2020 Guy Bourdin, who died in 1991, was a legend in the world of fashion photography. He was the most radical and audacious photographer of his generation but his reputation has been surrounded in secrecy - he rarely allowed his photographs to appear outside the pages of French Vogue. No book of his work has previously been published. His estate was frozen by the courts until 1997, after which his son, Samuel, gained control of his work as a result of which this long-awaited book can be published. Bourdin was originally a painter and a friend of Man Ray. His fashion photographs began to incorporate his surrealist influences. Fashion photography became an arena for his personal obsessions. The results are as shocking and astonishing as any commercial photograph ever published. They were executed meticulously. Despite his intense eroticism, subversion and, as Cecil Beaton described, 'his grotesque little gaminés', Beaton referred to him in 1975 as 'unquestionably the most interesting fashion photographer in Paris today'. His work was said to have represented 'the look of an era -glamorous, hard-edged, cleverly spiced with vulgarity.. .rich with implied narratives and strong erotic undercurrents'

Shooting Incident Reconstruction Jun 11 2022 Forensic scientists, law enforcement, and crime scene investigators are often tasked with reconstruction of events based on crime scene evidence, and the subsequent analysis of that evidence. The use and misuse of firearms to perpetrate crimes from theft to

murder necessitates numerous invitations to reconstruct shooting incidents. The discharge of firearms and the behavior of projectiles create many forms of physical evidence that, through proper testing and interpretation by a skilled forensic scientist, can establish what did and what did not occur. This book is generated from the authors' numerous years of conducting courses and seminars on the subject of shooting incident reconstruction. It seeks to thoroughly address matters from simple to complex in providing the reader an explanation of the factors surrounding ballistics, trajectory, and shooting scenes. The ultimate objectives of this unique book are to assist investigators, crime scene analysts, pathologists, ballistics experts, and lawyers to understand the terminology, science, and factors involved in reconstructing shooting incident events to solve forensic cases. The book will cover the full range of related topics including the range from which a firearm was discharged, the sequence of shots in a multiple discharge shooting incident, the position of a firearm at the moment of discharge, the position of a victim at the moment of impact, the probable flight path of a projectile, the manner in which a firearm was discharged and much more. Written by the most well-respected shooting scene and ballistics experts in the world Contains over 200 full-color diagrams and photographs that support and illustrate key concepts Case studies illustrate real-world application of technical concepts

Thematic Clip Art Jan 06 2022

Data for Room Fire Model Comparisons (Classic Reprint) Aug 21 2020 Excerpt from Data for Room Fire Model Comparisons Sections 3 and 4 present the types of analyses that can be used to examine large-scale room fire test data to prepare the data for comparison with zone-based fire models. Although not every technique was used for all data sets presented in this report, section 3 can be used for guidance in the design of future experiments. In addition, a rough guideline used to judge the quality of the data in each data set is described. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

NIST Research Reports Aug 13 2022

How to Hack Like a GHOST Feb 07 2022 There are a thousand and one ways to hack an Active Directory environment. But, what happens when end up in a full Cloud environment with thousands of servers, containers and not a single Windows machine to get you going? When we land in an environment designed in

the Cloud and engineered using the latest DevOps practices, our hacker intuition needs a little nudge to follow along. How did the company build their systems and what erroneous assumptions can we take advantage of? This book covers the basics of hacking in this new era of Cloud and DevOps: Break container isolation, achieve persistence on Kubernetes cluster and navigate the treacherous sea of AWS detection features to make way with the company's most precious data. Whether you are a fresh infosec student or a Windows veteran, you will certainly find a couple of interesting tricks to help you in your next adventure.

Cockcroft and the Atom, Mar 28 2021

Ballistic Imaging Dec 05 2021 Ballistic Imaging assesses the state of computer-based imaging technology in forensic firearms identification. The book evaluates the current law enforcement database of images of crime-related cartridge cases and bullets and recommends ways to improve the usefulness of the technology for suggesting leads in criminal investigations. It also advises against the construction of a national reference database that would include images from test-fires of every newly manufactured or imported firearm in the United States. The book also suggests further research on an alternate method for generating an investigative lead to the location where a gun was first sold: "microstamping," the direct imprinting of unique identifiers on firearm parts or ammunition.
