Planning and Conducting Needs Assessments Apr 02 2021 "Sometimes a book appears on your desk that successfully defines a field. You look at the book and say "thank you." Planning and Conducting Needs Assessments is such a book. . . . This book is clearly grounded in program planning and is not an afterthought or add-on to some other field. . . . I am excited to see this book appear in print. It clearly fills a niche that has been empty for some time: a practical approach to learning about and conducting needs assessments. . . . This is a marvelous book that should make a significant contribution to the field." --From the Foreword by Nick Eastmond, Utah State University "While it has the depth and breadth to be used in a classroom, Planning and Conducting Needs Assessments is written simply and directly enough to be a hands-on guide for needs assessment users and practitioners. The framework proposed by the authors is excellent in that it is readily understood and focuses attention on the most important details/issues in needs assessment practice. The fact that they also present an explanation of so many tools, including examples, makes the book required reading for anyone intending to plan or contract for a needs assessment." --John Theiss, Director of Planning and Evaluation, Texas

Exhibits and Displays Jan 12 2022 Exhibits and displays are booming and in demand at all types of libraries. From simple displays of books to full-scale museum-quality exhibitions, library exhibits can highlight collections that surprise visitors, tell stories, and engage audiences in innovative ways. Often, exhibits feature more than books—showcasing art, photographs, archival materials, multimedia elements, as well as hands-on activities. Stepping outside traditional walls, digital exhibits reach audiences beyond the circulation desk and pave another way for libraries to share information, promote resources, and even lead change in the community. Despite the growing interest, most library and information science (LIS) programs do not include exhibit development courses. It is not uncommon for librarians learn exhibit production on the job or through resources in the museum sector. Wearing many hats, librarians absorb exhibit work as part of community outreach initiatives, or take on exhibit duties as a general professional interest in the emerging field. Exhibits & Displays is a practical how-to guide that helps librarians unleash their library's potential to engage and wow visitors. The guide explains how to kick-start and grow an exhibit program through expert advice, insights from professional literature, and winning case studies that cover exhibition development from conceptual planning through de-installation packing and evaluation. A Practical Guide to Autism Mar 26 2023 Autism is in the public spotlight now more than ever as

new research and information appears almost daily. Although in many ways this is a positive development it also presents challenges to families and practitioners who want to keep up with the latest developments and are left to sift through new information by themselves to see what is credible and relevant for them. Each of us needs a personal research assistant who can determine which information we need to pay attention to and let us know how it might affect our daily work and the children we are living with or serve. Since we each don't have our own research assistants on staff, I am delighted to recommend this wonderful book by Fred Volkmar and Lisa Wiesner. Both of these talented professional leaders have combined their scientific skills and understanding of the field with great practical experience and ideas about how research can be translated into clinical practice. The result is a book that provides the best and most comprehensive information about recent scientific developments and a splendid practical guide for how they are being implemented and what we are learning in the process. The issues are presented in all of their complexity but translated into language that is clear, direct, and easy to follow. The format also lends itself to understanding the complex issues and their implications through excellent charts, question and answer sections, and chapters that vary from describing diagnostic issues to stating very specifically how to expand and evaluate the services one is receiving. The comprehensive references and lists of additional resources also add greatly to the overall package. As a professional dedicated to understanding scientific advances and helping families and teachers to utilize them most effectively, I am very pleased to have an ally like this book available. I am very grateful to the authors for providing a very credible, practical, and relevant addition to our field to help the many advocates and family practitioners to better understand the exciting new developments and how they can be implemented in our day to day work. Those taking the time to read through this superb volume will find it time well spent that pays back dividends in many

different ways. —FOREWORD by Gary B. Mesibov, Ph.D., Professor and Director of TEACCH, Treatment and Education of Autistic and Related Communication Handicapped Children University of North Carolina at Chapel Hill
