Review of the HIVNET 012 Perinatal HIV Prevention Study May 03 2021 Mother-to-child transmission of HIV-1 afflicts hundreds of thousands of children every year, especially in parts of the world such as sub-Saharan Africa, where HIV infection is prevalent and resources are limited. This tragic reality has spurred researchers to search for an effective, safe, and inexpensive treatment that could reduce the risk of perinatal HIV transmission. The HIVNET 012 trial was designed to provide preliminary information on the comparative safety and efficacy of two relatively simple and inexpensive short courses of oral antiretroviral treatment likely to be feasible in resource-limited settings. The resulting report identified some problems with procedures and documentation, but concluded that these issues did not compromise the results of the study. However, these issues have led to public scrutiny and continued controversy. Review of the HIVNET 012 Perinatal HIV Prevention Study critically and objectively evaluates the study's design and conduct, and assesses the impact of the initial procedural issues on the validity of the overall findings and conclusions of the trial.

Doing a Literature Review Jul 17 2022 ?This book can provide an excellent framework for bolstering what is often an experiential process - doing a literature review. It is best seen alongside the supervisor, as a guide, through the multidimensional sea of academic literature? - *British Educational Research Journal* Reviewing the literature for a research project can seem a daunting, even overwhelming task. New researchers, in particular, wonder: Where do I start? What do I do? How do I do it? This text offers students across the social sciences and humanities a practical and comprehensive guide to writing a literature review. Chris Hart offers invaluable advice on how to: search out existing knowledge on a topic; analyse arguments and ideas; map ideas, arguments and perspectives; produce a literature review; and construct a case for investigating a topic. *Doing a Literature Review* contains examples of how to cite references, structure a research proposal and present a Master's thesis. It is published as a Set Book for The Open University Postgraduate Foundation Module (D820) *The Challenge of the Social Sciences*. `I have been waiting for this book for five years. It sets out a number of important dimensions involved in the process of literature review and by clear signposting, diagrams, and examples will help the student to carry out her or his review more systematically. Learning how to carry out a literature review has always entailed the experiential. While this is a the best way of learning, it is only so providing that learning actually takes place during the experience (or by reflection afterwards). This book makes explicit those dimensions which could remain implicit or even missed by the student as they wade through all those books, papers, articles, and print-outs? - Kevin Maguire, Nottingham Trent University *SAGE Study Skills* are essential study guides for

students of all levels. From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your time at university.
